

MEMORANDUM CITY OF TUALATIN

TO: Honorable Mayor and Members of the City Council

FROM: Sherilyn Lombos, City Manager

DATE: June 10, 2013

SUBJECT: Work Session for June 10, 2013

6:00 p.m. (15 min) – Timeline for Chicken Ordinance. Staff will present a proposed timeline for bringing an ordinance to the City Council for consideration.

6:15 p.m. (30 min) – SW Corridor High Capacity Transit Recommendation for Additional Analysis. Metro, in partnership with TriMet, ODO, Washington County and the cities in the corridor, has developed a draft recommendation narrowing down the high capacity transit options to study further. This recommendation will be presented to the SW Corridor Steering Committee on June 10, and brought to this work session for the Council's consideration and discussion of next steps.

6:45 p.m. (10 min) – Council Meeting Agenda Review, Communications & Roundtable.

This is the opportunity for the Council to review the agenda for the June 10th City Council meeting and take the opportunity to brief the rest of the Council on any issues of mutual interest.

MEMORANDUM

CITY OF TUALATIN

TO: Honorable Mayor and Members of the City Council

THROUGH: Sherilyn Lombos

FROM: Cindy Hahn, Associate Planner
Alice Rouyer, Assistant City Manager

DATE: 06/10/2013

SUBJECT: Discuss a Timeline for Preparing a Chicken Ordinance

ISSUE BEFORE THE COUNCIL:

The purpose of tonight's meeting is to discuss a timeline for preparing an ordinance regulating chickens in residential areas of Tualatin.

EXECUTIVE SUMMARY:

At the May 28, 2013 work session, staff presented input from the Citizen Involvement Organizations (CIOs) as well as individual community members about backyard chickens. City Council had several questions related to this topic and asked staff to return to a future work session with additional information and a timeline for preparing an ordinance regulating chickens in residential areas of Tualatin.

Staff is researching the questions posed by Council and has prepared a timeline, which will be presented to Council at tonight's work session.

MEMORANDUM

CITY OF TUALATIN

TO: Honorable Mayor and Members of the City Council

THROUGH: Sherilyn Lombos

FROM: Ben Bryant, Management Analyst

DATE: 06/10/2013

SUBJECT: Southwest Corridor High Capacity Transit Recommendation For Additional Analysis

ISSUE BEFORE THE COUNCIL:

Receive an update and provide input on the Southwest Corridor high capacity transit recommendation for additional analysis.

EXECUTIVE SUMMARY:

At the last City Council Work Session, Metro presented the Southwest Corridor high capacity transit evaluation results. The key findings of the evaluation results indicated significant future ridership between Portland and Tualatin. It also highlighted that while there is a section of the corridor which could support high capacity transit (Portland, Tigard, Tualatin), many places can be better served with improvements to local bus service (i.e. Tualatin-Sherwood Road).

Draft Recommendation

Since the last meeting, Metro, in partnership with TriMet, ODOT, Washington County, and the cities in the corridor, has developed a draft recommendation narrowing down the high capacity transit options to study further. The recommendation is split into two main sections. The first is a narrowing down of the number of high capacity transit options to move forward through additional study and public outreach. Finally, the second section identifies numerous other transportation projects (road improvements, sidewalk connections, trail extensions, etc.) that will support a future high capacity transit line. Specifically the draft recommendation includes the following for each section:

1. Transit

Options To Remove From Study:

- High capacity transit to Sherwood will not be studied further given its high cost and minimal benefits; and,
- The "Hub and Spoke" option will not be studied further given its high cost.

Options To Study More:

- TriMet will conduct a local bus service enhancement study in 2014 to identify short and long term bus improvements in recognition that local service is of paramount importance;
- Bus-Rapid Transit to Tualatin, via Tigard; and
- Light-Rail to Tualatin, via Tigard.

At this point in the process, an exact alignment has not been chosen. Throughout 2014, the City of Tualatin will work with the community and our regional partners to further study the merits of bringing high capacity transit to Tualatin. If it is determined that high capacity transit is feasible and beneficial, alignment options will be evaluated and discussed in the coming year.

2. Other Projects

The draft recommendation includes many projects identified during Tualatin's Transportation System Plan update that will support corridor-wide goals and a high capacity transit alignment. The most significant of these projects include:

- Tualatin-Sherwood Road Widening;
- Boones Ferry Road Bridge Widening;
- Cipole Road Widening;
- Herman Road Improvements;
- Tualatin River Greenway;
- Nyberg Creek Greenway;
- North/South I-5 Parallel Path; and,
- Westside Trail.

Discussion

Tualatin staff members will ask for your initial thoughts and feedback on the evaluation results and draft recommendation at the meeting.

Next Steps

Throughout June and July, City staff members will present the recommendation to the TPARK (June 18th), Planning Commission (June 20th), Transportation Task Force (June 25), and at an open house (Tigard - June 26). The input gathered at these meetings will be shared with the City Council in an effort to provide guidance to the SW Corridor Steering Committee in June and July.

Draft Recommendation Transit

Options To Remove From Study:

- High capacity transit to Sherwood
- "Hub and Spoke" option

Options To Study More:

- TriMet local bus service enhancement study
- Bus-Rapid Transit to Tualatin, via Tigard*
- Light-Rail to Tualatin, via Tigard*

* Exact alignments to be determined through public process in 2014.

Draft Recommendation Roadway & Parks Projects

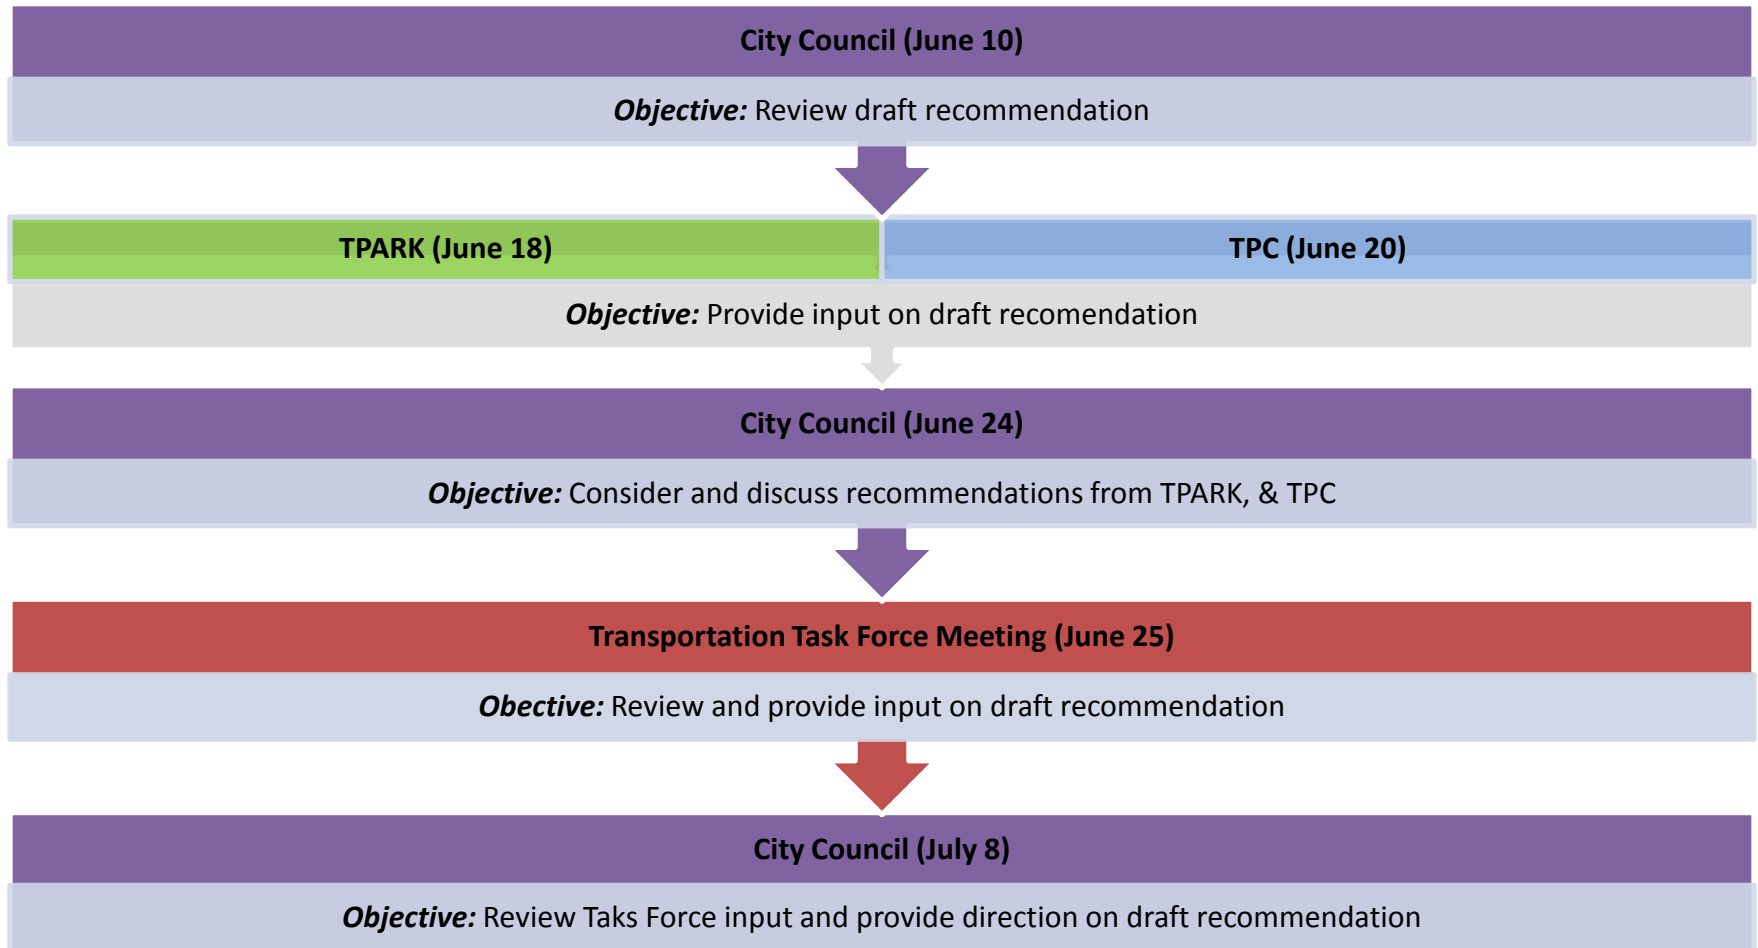

Roadway Projects

- Tualatin-Sherwood Road Widening
- Boones Ferry Road Bridge Widening
- Cipole Road Widening
- Herman Road Improvements

Parks/Trails Projects

- Tualatin River Greenway
- Nyberg Creek Greenway
- North/South I-5 Parallel Path
- Westside Trail

Next Steps

Draft PTL recommendation

Making investments in the Southwest Corridor

The Southwest Corridor Plan and Shared Investment Strategy is an outcomes-oriented effort focused on supporting community-based development and placemaking that targets, coordinates and leverages public investments to make efficient use of public and private resources. The plan was developed to support achieving four balanced goals:

Accountability and partnership

Partners manage resources responsibly, foster collaborative investments, implement strategies effectively and fairly, and reflect community support.

Prosperity People can live, work, play and learn in thriving and economically vibrant communities where everyday needs are easily met.

Health People live in an environment that supports the health of the community and ecosystems.

Access and mobility People have a safe, efficient and reliable network that enhances economic vitality and quality of life.

Steering committee members

Metro Councilor Craig Dirksen, co-chair
 Metro Councilor Bob Stacey, co-chair
 Tigard Mayor John Cook
 Beaverton Mayor Denny Doyle
 Portland Mayor Charlie Hales
 Lake Oswego Councilor Skip O'Neill
 TriMet general manager Neil McFarlane
 Sherwood Mayor Bill Middleton
 Tualatin Mayor Lou Ogden
 Washington County Commissioner Roy Rogers
 Durham Mayor Gery Schirado
 Multnomah County Commissioner Loretta Smith
 ODOT Region 1 manager Jason Tell
 King City Commissioner Suzan Turley

Overview

This document presents a draft recommendation and action plan for the Southwest Corridor Plan Steering Committee to consider. This packet includes:

- a draft recommendation, to be revised and confirmed in July
- priority projects to be considered for the final investment package
- considerations for improvements to the regulatory environment to best leverage public investments.

The steering committee will be asked to issue its draft recommendation on July 8, 2013. Outstanding issues will be addressed and the final recommendation will be affirmed on July 22, 2013.

Vision and context

The work has been guided by a steering committee that includes representatives from Southwest Corridor cities, counties and agencies.

Six major planning efforts are coordinated with this effort:

- Portland Barbur Concept Plan
- Sherwood Town Center Plan
- Tigard HCT Land Use Plan
- Linking Tualatin
- Southwest Transportation Plan
- Transit Alternatives Analysis.

The project partners have defined a set of potential investments that support land use, transportation, and community-building goals in the corridor – a Shared Investment Strategy – to implement the shared Southwest Corridor vision. The policies and projects are all aimed at supporting development that is consistent with the communities' aspirations for key places in the corridor.

Summary of the Southwest Corridor Plan Shared Investment Strategy recommendation

1. Investments in the public realm

A set of potential investments that will inform local capital improvement plans and transportation system plan development, TriMet's Transit Investment Priorities, and the next update of the Regional Transportation Plan.

Transit investments

- Enhanced local transit service to support the development of key places in the Southwest Corridor and connection to many places outside the corridor (page 6)
- A narrowed set of high capacity transit alternatives for further study to inform a future steering committee decision about what, if any, transit investments to consider under the National Environmental Policy Act (NEPA) (pages 6 and 7)

Roadway and active transportation investments

- A set of roadway and active transportation investments that are highly supportive of the narrowed set of high capacity transit alternatives (page 8)
- A set of roadway and active transportation investments that are highly supportive of the land use vision for key places in the Southwest Corridor, including existing centers and corridors as well as growing employment and industrial areas (page 8)

Parks and natural resource investments

- A set of projects including parks, trails and natural resource enhancements to support the quality of life in key places, address "green" needs in the corridor, and leverage transportation investments (page 9)

2. Regulatory environment and development catalyst investments

These include proposed policy changes and development incentives for consideration by project partners.

DISCUSSION DRAFT, June 5, 2013

Shared Investment Strategy

Public actions can influence development in three main ways: by regulations and policies, by investments in the public realm, and by development incentives that catalyze private investment. The Southwest Corridor Plan and Shared Investment Strategy address all three of these areas.

Moving from current conditions to community visions

Regulations and policies

- Zoning changes
- Development requirements
- Policy coordination

Investments in the public realm

- High capacity transit
- Roadway expansions or improvements
- Bike and pedestrian facilities improvements
- Green (parks, natural areas and natural resources) improvements

Development incentives that catalyze private investment

- Public development grants such as through the transit-oriented development program

The Southwest Corridor Land Use Vision – a community vision for places throughout the corridor

Each city in the Southwest Corridor began this collaborative effort by looking at their downtowns, main streets, corridors and employment areas to define a vision for these places that reflects their unique characteristics and local aspirations. The area contains a wealth of opportunities for jobs and stable neighborhoods and is expected to grow significantly in the future. The corridor contains important regional retail and employment destinations as well as many major trails and the nation's only urban national wildlife refuge.

	Households	Jobs
2010	79,038	140,000
2035	111,928	259,182

The Southwest Corridor Land Use Vision compiles local land use plans and puts them into a common language, creating a foundation for the many projects (ranging from transportation to parks) to be categorized and prioritized based on how well they support the shared corridor land use vision.

The corridor vision emphasizes maintaining and enhancing the many stable single-family neighborhoods, while allowing for growth in certain places that create more services for existing residents as well as more housing, employment and transportation choices in the future. The areas of change are described in four categories:

- **Retail/commercial** The corridor is a destination for retail with three prominent shopping destinations in Washington Square, Bridgeport Village, and Six Corners. These retail destinations will continue to generate substantial demand and will need accommodation through enhanced transit, active transportation and roadway investments.
- **Employment/industrial** The Southwest Corridor includes a regional employment district with significant current employment and anticipated growth as new jobs move into the Tigard Triangle and the industrial areas of Tualatin and Sherwood.
- **Mixed use** Intended to include a mix of housing, employment and services in a walkable environment. Good access to transit with high quality pedestrian and bike facilities are critical elements for these mixed use areas to help leverage infill and redevelopment.
- **Higher intensity residential** Infill and redevelopment is going to be the primary generator for new development in the corridor. The majority of residential development that does occur will be found in the mixed-use areas.

To develop the land use vision, each city identified key places and categorized them based on the importance of a high capacity transit investment to connect them. These key places were used to draw the draft high capacity transit alternatives, thus ensuring that the transportation solution supports the community's vision for growth. The prioritized key places also help focus investments for other types of transportation as well as parks and natural resources.

Public involvement for Phase I

September 2011 to February 2012: What should be the focus of the plan?

The first public engagement stage of the Southwest Corridor Plan was held September 2011 to February 2012 and aimed to determine the scope, evaluation framework and goals of the overall plan.

In that process, project partners focused on announcing the integrated planning effort, informing the public about the background and elements of the plan, and asking residents what they value about their communities. Residents and business people were asked about challenges and opportunities in the corridor and their visions for the future of the area. The information and ideas offered informed decision-makers as they determined the scope and goals of the plan.

During the public comment period of Sept. 28 through Oct. 28, 2011, respondents posted their thoughts on boards at an open house and community events and submitted 98 public comments via the online questionnaire, mail and email.

February 2012 to August 2012: How should the wide range of potential projects be narrowed?

The second public engagement stage of was held February 2012 to August 2012 and aimed to demonstrate and validate the screening process of narrowing the wide range of ideas to a narrowed list of potential projects.

From June 22 through July 31, 2012, project partners hosted an online, virtual open house. Participants in the online open house viewed video feeds that explained the purpose and process of the overall plan. Participants were then directed to a related questionnaire that asked whether the sources of projects for the corridor were considered comprehensive and if the process for narrowing that list to move forward reflected the values of the communities in the corridor. The questionnaire received 543 responses.

An existing conditions summary, an executive summary and technical reports were produced during this time. Outlining the unique physical, economic and demographic elements of the corridor, the reports identified existing challenges and potential opportunities in economic development, housing choices, natural areas, trails and health for the corridor.

August to December 2012: How should investments be prioritized?

The third public engagement stage was held August to December 2012 and aimed to set the framework for shared investment strategies based on potential projects that were identified in the previous stage.

From Nov. 14, 2012 to Jan. 1, 2013, project partners hosted the online interactive Shape Southwest game and associated questionnaire. A paper version of the questionnaire was distributed in English, Spanish and Vietnamese to libraries and agencies serving environmental justice communities to engage residents without computer access. Community planning forums were convened on Oct. 9 and Dec. 3, 2012. During this time, project staff hosted booths at community events and briefed community groups, specifically to engage environmental justice communities. Additionally, community group briefings were held by project partner staff focusing on the local land use plans but also highlighting the Southwest Corridor Plan.

Public engagement at this stage of the plan focused on discussions of the benefits and tradeoffs of different types of investments, beginning with the premise that we cannot afford everything. Benefits and tradeoffs were framed by the Southwest Corridor Plan goals of health, access and mobility, and prosperity in the Southwest Corridor.

During the public comment period, 2,098 people visited the project website to learn about the Southwest Corridor Plan, 695 submissions to Shape Southwest were made, 471 electronic questionnaires were submitted, and 20 paper-version questionnaires were received. Two Spanish-language questionnaires and no Vietnamese-language questionnaires were received.

January to July 2013: Are these the right things to move forward?

During this stage of public involvement, project staff provided briefings to community groups and municipal committees and sponsored public events to gather feedback that will inform decision-making. Events included an open house hosted by SW Neighborhoods, Inc. on April 25, participation in the Tigard Town Hall on April 30, an economic summit on May 21 and a community planning forum on May 23 to gather feedback on potential projects and the draft high capacity transit alternatives. This opportunity for input was replicated through an online questionnaire that will be open between May 23 and June 26. The public will be given an opportunity to review the Southwest Corridor Plan draft recommendation and give feedback in an additional online questionnaire from June 11 to 26. The draft recommendation will be the focus of the final community planning forum on June 26. Public input will be delivered to decision-makers in advance of the July 8 meeting.

Integrating public investments to support great places

The Southwest Corridor Plan aims to use limited public resources wisely by targeting them in identified key places to support the local land use vision. It also sets the stage to look at how investments in transportation projects, parks and habitat improvements can be made together. This allows for efficiencies in planning and the ability to achieve multiple goals in targeted areas. The Southwest Corridor Plan goals direct us to **collaborate**, **target resources** and search for opportunities to **leverage dollars**.

Collaborate

The project partners agree to work together to implement common prioritized projects that support the land use vision. The private sector can bring investment in buildings, retail businesses, and jobs that help make great places. Nonprofit partners and other public agencies play an essential role in ensuring that the Southwest Corridor continues to equitably and sustainably provide opportunities for a diverse range of people and maintains the green identity so important to current and future residents. In future phases, project partners should identify best practices and proven implementation strategies to help private, public and non-profit agencies work together to make the Southwest Corridor vision a reality.

Target resources

Focusing on the Corridor Land Use Vision has enabled project partners to limit the number of projects included in the shared investment strategy. A smaller prioritized list makes it easier to work together to fund and implement a set of common priorities.

By working together and listening to the public, the project partners narrowed a wide ranging list of roadway and active transportation projects from almost \$4 billion to about \$500 million. The list includes projects that would be highly supportive of a future high capacity transit investment, and a strategic list of projects that support the land use vision in the corridor.

The Southwest Corridor Plan includes the region's first coordinated list of parks, trails and natural resource projects for implementation in tandem with transportation projects to support the community vision. The project partners created a list of nearly 450 projects gathered from local parks master plans, habitat improvement lists, and other sources. This was narrowed to the smaller list of parks, trails and natural resource projects included in the Shared Investment Strategy. The list serves as a strategic resource to help project partners identify projects that leverage the benefits of – and funding for – transportation projects in the shared investment strategy.

Leverage

Great places are defined by a variety of elements that congregate in one location to meet a range of community needs. Investing in a road improvement might not create a great place – but combining it with a trail, a culvert replacement and bus stop improvements makes it more likely to help catalyze the market and attract private investment to build the community vision.

The narrowed lists of projects that are oriented towards specific places can serve as a tool for agencies to work with when making future investment decisions. Even more important is continued communication between agencies, both internal (e.g., city transportation, parks and environmental services departments) and external (e.g., city transportation and county transportation or TriMet).

Add examples

Add photo or diagram from pro forma work

Action

The Southwest Corridor Plan and Shared Investment Strategy is an outcomes-oriented effort targeted towards implementing the projects that support the Corridor land use vision over the next 15 years. This includes exploring policy changes and development incentives as well as a strategic project list for transit, roadway, active transportation and parks and natural resources. The Southwest Corridor Evaluation results, project partner priorities, and public input provided the foundation for the Shared Investment Strategy.

It is understood that many Southwest Corridor communities have transportation needs outside the boundaries of this plan, and will likely consider significant investments in other corridors during the time frame covered by the Southwest Corridor Plan. The Southwest Corridor Shared Investment Strategy is not intended to be a comprehensive listing of all priority projects in the area. Rather, it is a list of projects and policies that best meet the land use goals and objectives approved by the Southwest Corridor Steering Committee in this early phase of the project. As project partners consider development and transportation needs in a variety of locations and corridors in their communities, the Shared Investment Strategy defines specific actions, responsibility, timeframe and potential resources that are critical to supporting the Southwest Corridor Land Use Vision.

Investments in the public realm

Transit

In July, the Steering Committee is being asked to give direction on three main questions to further narrow the options for a potential high capacity transit investment to serve the corridor land use vision. These questions include: modes (bus rapid transit and/or light rail) for further study, percentage of bus rapid transit dedicated transitway, and the destination of a potential high capacity transit investment. Additionally, the steering committee will identify the key questions to be answered during a refinement phase as the project partners define a project for analysis under the National Environmental Policy Act (NEPA).

The following is the staff recommendation for further study for a Southwest Corridor transit investment.

Local service/Southwest Corridor service enhancement

Local transit connections will be essential to achieving the land use vision in the Southwest Corridor, as well as to the success of a potential high capacity transit investment. In 2013-2014, TriMet will work with Southwest Corridor jurisdictions and stakeholders to develop the Southwest Service Enhancement Plan.

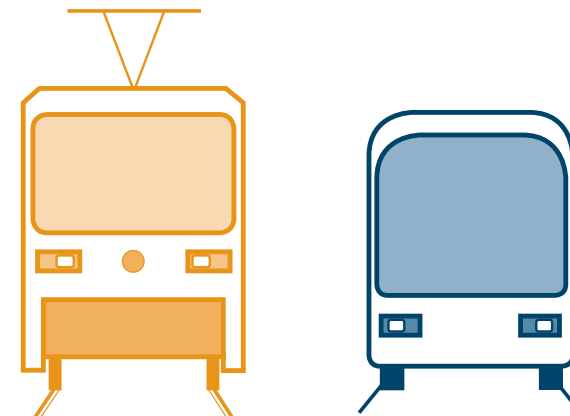

This recommendation directs TriMet to implement Southwest Service Enhancement Plan to provide the following:

- transit service that connects key Southwest Corridor locations quickly and reliably to one another and to a potential high capacity transit line
 - These include but are not limited to: Beaverton, Washington Square, Lake Oswego, King City, Durham, Tualatin industrial areas, and downtown Sherwood.
 - This includes improved local transit circulation from the Southwest Corridor throughout Washington County, including connections to northern Washington County.
- improved local transit connections to Westside Express Service
- capital improvements necessary to achieve higher transit system functioning, such as “queue jumps” and/or re-orientation of existing transit lines to better connect key corridor areas and a future high capacity transit system
- identification of improvements cities and counties can make for better transit access (e.g., sidewalks and safe pedestrian crossings).

Mode

Both light rail and bus rapid transit are recommended as modes for further study based on (1) the high ridership potential of both modes and (2) the need for additional design in order to produce more accurate capital cost estimates that clarify tradeoffs among cost, operating efficiency and support for the Southwest Corridor Land Use Vision.

Bus rapid transit: Exclusive transitway or mixed traffic?

Bus rapid transit is a highly flexible and versatile transit mode. This also means that it can be difficult to clearly define and that every bus rapid transit project is constantly under pressure to cut costs by reducing how “congestion-proof” it is.

Running buses in mixed traffic is less expensive – it is also slower and has more delay with less certainty about arrival times and travel times. Bus rapid transit in mixed traffic can still be a significant improvement compared to local buses without transit priority treatments, but it cannot attract as many riders and therefore cannot support the development of a corridor as much as bus rapid transit in exclusive lanes.

Because bus rapid transit is so flexible, every intersection or congestion point raises the same question during design: Should this section be “congestion-proof,” or is that too problematic and should we put it in mixed traffic – or some middle ground with transit priority but not exclusive transit?

The BRT Standard by the Institute for Transportation & Development Policy is one way of rating the value of an individual bus rapid transit project. Using such a rating system creates an inherent pressure to make a high-performing project, and creates a healthy tension against the tendency to lower cost, but lower benefit solutions. The standard is very high – there are only 12 gold standard projects in the world, none of which are in the United States. There is only one silver standard project in the United States: Cleveland’s HealthLine.

For more information on the BRT Standard by the Institute for Transportation & Development Policy, visit www.itdp.org/microsites/the-brt-standard-2013/.

Percentage of bus rapid transit in dedicated transitway

As bus rapid transit is studied as a potential high capacity transit mode, it is recommended that between 50 and 100 percent of the route runs in exclusive right of way. Federal Transit Administration “New Starts” funding is only available for bus rapid transit projects with 50 percent or more of the project in dedicated transitway, and experience around the U.S. and internationally suggests that bus rapid transit with a higher level of exclusive transitway would best support the Southwest Corridor Land Use Vision. The Institute for Transportation & Development Policy has developed a bus rapid transit certification system that rates project performance. As bus rapid transit advances for further study, it is recommended that project partners aim for a project that meets Institute for Transportation & Development Policy certification standards.

Destination

The recommended destination for further study for a high capacity transit investment is Tualatin, via Tigard. This recommendation is based on ridership potential, operational efficiency, and plans for increased housing and employment in Tigard and Tualatin.

Funding

Capital funding for construction of major transit projects comes from a variety of sources, including competitive grants and federal, state and regional funds. Transit operations (both bus and high capacity transit) are funded by passenger fares and

Steering committee decisions: high capacity transit

With this recommendation, the steering committee will have narrowed the potential high capacity transit alternatives/concepts from 10 to two.

Future decisions will include determining the alignment, lane treatments, specific funding strategies, mode, station locations and connections for the rest of the transit system.

October 2012	July 2013	mid-2014	early 2017
Narrow from 10 alternatives concepts to five	<ul style="list-style-type: none"> • Direction on Southwest (Transit) Service Enhancement Plan • Policy direction on “level” of BRT for further study • Which modes to carry forward for further study • Destination 	<p><i>Refinement</i></p> <ul style="list-style-type: none"> • Alignments <ul style="list-style-type: none"> • Naito or Barbur? • Surface or tunnel (if light rail)? • Direct connection to PCC? • Hall or 72nd? • Add a lane or convert a lane? • Potential station locations • Funding strategies 	<p><i>Draft Environmental Impact Statement</i></p> <ul style="list-style-type: none"> • Mode • Station locations • Transit system connections

The October 2012 decision removed streetcar to Sherwood, high capacity transit connection between Tigard and Sherwood on Highway 99W, and the idea of adding or converting an Interstate 5 lane for high occupancy vehicle or high occupancy transit lane from further consideration and tabled consideration of WES improvements for another time and process.

This recommendation would remove the option of the “hub and spoke without transfer” and bus rapid transit between Tualatin and Sherwood from consideration and would provide that a bus rapid transit alignment would require at least 50 percent dedicated right of way.

a regional payroll tax. Any high capacity transit project would likely seek competitive federal funding through the Federal Transit Administration (FTA) which has contributed more than half the total funding for MAX projects to date. High capacity transit will require a corridor-wide funding strategy that secures and leverages new resources, possibly including a competitive grant from the Federal Transit Administration to fund a high capacity transit investment. An FTA grant would most likely require a 50 percent match which can include local, regional, state and other non-FTA federal funds.

DISCUSSION DRAFT, June 5, 2013

Roadway and active transportation

Over the past 18 months the project partners worked to narrow a large list of roadway and active transportation projects to a smaller list of projects that are most supportive of the HCT recommendation and the Southwest Corridor Land Use Vision. Project partners narrowed from close to \$4 billion worth of projects to around \$500 million. This agreed-upon narrowed list of projects sets the stage for the project partners to cooperatively identify and leverage funding from a variety of sources. This will be critical, in light of the severe constraints on available transportation funding. Even the narrowed list of roadway and active transportation projects is more than five times greater than the projected \$60 million in state and regional funds anticipated to be available in the Corridor over the next 15 years.

Projects on the narrowed list fall into one of two categories:

1. Projects to be studied further in the Southwest Corridor Plan refinement phase

This includes roadway and active transportation projects that could be highly supportive for the success of a high capacity transit investment. While this group of projects has been identified as highly supportive of a potential high capacity transit investment, not all of them can necessarily be included in an eventual high capacity transit funding package (for example, about \$35-40 million was included as part of the Portland-Milwaukie Light Rail Project). This will be a future decision based on priority judgments by project partners during refinement and efforts to best match Federal Transit Administration funding requirements. Those projects that are not included will be available for further project development by project sponsors.

2. Narrowed list of projects that have been identified as highly supportive of the Southwest Corridor Land Use Vision

These projects include roadway and active transportation projects that are available for further project development by project sponsors. Each project has been identified as highly supportive of a particular land use type in the corridor: commercial, freight/employment, mixed use, or higher intensity residential. Projects were selected based on geographic factors, project characteristics, stakeholder input and/or evaluation results.

As stated earlier, these lists are not intended to identify all projects that are important to communities in the Southwest Corridor. Instead, they represent a set of projects that are highly supportive of corridor land use and high capacity transit goals based on the narrowing approach intended to target and leverage limited public dollars. The lists will inform local capital improvement plans and transportation system plan development, TriMet's Transit Investment Priorities, and the next update of the Regional Transportation Plan. Projects on local and regional transportation investment plans that are not included in the Shared Investment Strategy will remain on those local and regional plans unless the jurisdiction chooses to remove them.

Attachment A includes the project lists and narrowing criteria.

Roadway projects supportive of land use goals and high capacity transit, by specific development type

Lake Oswego – Land use

- 5004 Boones Ferry Road Boulevard improvements (turn lanes with bike/ped. - Madrona to Kruse Way)

Portland – High capacity transit

- 1004 South Portland Circulation and Connectivity (Ross Island Bridge ramp connections)
- 4002 Barbur Blvd, SW (3rd - Terwilliger): Multi-modal Improvements
- 5005 Barbur Blvd, SW (Terwilliger - City Limits): Multi-modal Improvements
- 5007 Barbur Signals (add signalized intersections)
- 5009 Capitol Hwy Improvements (replace roadway and add sidewalks)
- 5057 SW 53rd and Pomona (improves safety of ped/bike users)

Portland – Land use

- 1019 Barbur Road Diet - Capitol to Hamilton (reduce northbound lanes from three to two with multi-modal improvements)
- 1028 Barbur/Terwilliger Intersection Ped./Bike Improvements
- 5006 Barbur Lane Diet: Terwilliger to Capitol
- 5008 Barbur/ Capitol Hwy./ Huber/ Taylors Ferry Intersection Safety Improvements
- 5013 Naito/South Portland Improvements (left turn pockets with bike/ped; remove tunnel, ramps and viaduct)
- 5059 SW Portland/ Crossroads Multimodal Project (roadway realignments and modifications to Barbur Blvd., Capitol Hwy., and the I-5 southbound on-ramp)

Tigard – High capacity transit

- 1077 Ash Avenue railroad crossing (new roadway)
- 1078 Atlanta Street Extension (new roadway)
- 1098 Hall Boulevard Widening, Bonita Road to Durham
- 1100 Hall/Hunziker/Scoffins Intersection Realignment
- 1107 Hwy. 217 Over-crossing - Hunziker Hampton Connection
- 5024 68th Avenue (widen to 3 lanes)
- 5035 Hall Boulevard Widening, Highway 99W to Fanno Creek
- 5036 Hall Boulevard Widening, McDonald Street to Fanno Creek including creek bridge

Tigard – Land use

- 1129 Highway 99W access management in Tigard
- 5037 Hall Boulevard Widening, Oleson to 99W

Tualatin – High capacity transit

- 1134 Boones Ferry Road (reconstruct/widen from Martinazzi to Lower Boones Ferry)

Tualatin – Land use

- 1154 Tualatin-Sherwood Rd. (Langer Parkway to Teton Ave.) - Widening to 5 lanes with ped./bike (Tualatin and Sherwood)
- 5047 Cipole Rd. (widen to 3 lanes with ped./bike)
- 5048 Herman (multi-modal improvements, Teton to Tualatin Rd.)
- 5049 Herman (multi-modal improvements, Cipole to 124th)

Sherwood – Land use

- 1062 Arrow Street (Herman Road) - Build 3 lanes with sidewalks and bike lanes
- 1068 Town Center Signal & Intersection Improvements (Downtown Sherwood)
- 1154 Tualatin-Sherwood Rd. (Langer Parkway to Teton Ave.) - Widening to 5 lanes with ped./bike (Sherwood and Tualatin)
- 5020 Oregon-Tonquin Intersection & Street Improvements

Key

- Retail/commercial
- Mixed use
- Employment/industrial
- Higher intensity residential

Parks and natural resource projects

Parks, trails, natural areas and street trees provide the “green” element of communities that is consistently prioritized by corridor residents as part of what draws them to live, work and play in the Southwest Corridor. Project partners originally identified nearly 450 projects in the corridor, this recommendation includes a narrowed list of “green” projects - parks, trails, natural areas, stormwater facilities, green streets and natural resource enhancements like wildlife corridors and improved culverts for fish passage. The projects on the list were identified as supporting the Southwest Corridor Land Use Vision, the potential high capacity transit investment, and important water resource and regional trail connections. Project partners are currently reviewing this refined list and will identify any recommended changes by the July 8 steering committee meeting.

As the high capacity transit alternative is refined, the next step in sorting and prioritizing “green” projects in the Southwest Corridor may be for partners to examine the likely funding sources and develop a collective strategy for grant writing and the strategic use of other available or new funds. A refined project list could be developed based on this shared funding strategy.

Importantly, the project list does not include the numerous impacts and mitigation projects that would be required as a result of a new transit corridor, road and street construction and redevelopment. As land use and transportation projects are implemented, Southwest Corridor partners will work to identify relationships to or impacts on nearby or adjacent “green” projects. This strategy recommends prioritizing those projects that offer multiple benefits and a higher return on investment for the public’s resources, regardless of the source of those funds.

Attachment B includes the narrowed list of projects and the parks and natural areas narrowing methodology.

Development case studies

Public involvement report

Alternatives Analysis (for submittal to FTA)

Development strategy (regulatory environment and catalyst investments)

The public sector plays a key role in the implementation of the community land use vision. There are two major tools the public sector controls that can help set the stage for development consistent with community goals. Those tools are the regulatory framework and the administration of financial incentives which together can help catalyze development to create market value and stimulate private investment.

The regulatory framework is the area in which the public sector has the most control over development outcomes. This includes development (zoning) codes and policies that relate to land development. A goal should be to make development consistent with the community vision the easiest thing to do. This can be accomplished by creating a regulatory framework that is predictable and efficient, creating certainty in the private market. It also provides the community with certainty that future development in their community will be in the desired locations with a form consistent with the vision. To successfully implement a land use vision that goes beyond the existing development form requires both public support and market potential. The public sector has the ability to control the policies and code requirements that have a direct effect on the bottom line and create a regulatory environment that supports investment in their community.

The public sector can also help catalyze development through the strategic application of financial incentives that support new development forms that may be ahead of the market. In particular, development forms that are mixed-use or multi-story are more costly and may require rents that are above current market demand. These higher costs can be offset through creative financing strategies and tools, helping to create value in the market and eventually enable private investments to be made without public support. By aligning the regulatory framework, strategic incentives to catalyze development and prioritizing capital investments in the public realm the public sector has a tremendous opportunity to create successful places that reflect the land use vision.

New Starts competitive advantage

By setting the right regulatory and financial environment the public sector can catalyze the market and ideally make our region more competitive for federal capital construction dollars that are associated with the Federal Transit Administration's New Starts program. These guidelines provide a series of actions that local governments can take to leverage a transit investment, including plans, policies, and financial incentives along the proposed corridor that support the adjacent land use and ideally bring more transit riders to the system. These actions should support the following outcomes:

- additional, transit-supportive development in the future
- preservation or increase in the affordable housing supply
- increased population and employment concentrations.

At this phase of the Southwest Corridor Plan the focus is on identifying potential policy changes or incentives that help the region compete nationally for limited dollars. Many of these strategies are already in place in some cities in the corridor, and our region is recognized nationally for progressive land use policies. This may raise the bar for our region in terms of what we need to implement as the project partners move through a NEPA process.

Regulatory framework

The Southwest Corridor Land Use Vision expresses the collective aspirations of the communities in the corridor, much of which is focused on creating transit ready communities that can leverage an investment in high capacity transit. High capacity transit has the potential to have a catalytic effect on adjacent land uses especially if transit supportive regulations and policies are in place well in advance of the high capacity transit investment. These policies are an opportunity to support the land use vision now and to help achieve the community's desired goals over time. There are a number of regulatory tools and strategies that can help foster transit ready communities; however their application differs greatly depending on the context in which they are applied. A number of these tools may specifically be identified in FTA guidance for the New Starts program. The policies that are recommended for further action by local partners include:

Zoning code changes

- Examining density maximums and building height
- Non-compliant use provision
- Stepbacks

Parking requirements and parking management

- Trip generation reductions
- Responsive parking ratios
- Shared parking
- Unbundling parking

Design

- Layered landscapes and active open space
- Ground floor active use provisions
- Street design, streetscapes and green streets

Financial incentives

There are a number of financial tools available to the public sector that can be used to help stimulate investment in strategic locations. These tools can help bridge the financial gap between what is financially feasible now and what is desired by the community. In many cases the vision that the community has is above and beyond what the current market can provide. Investments in the public realm (such as streetscape enhancements and transit investments) are one way to send a message to the private sector that the public is committed to implementing the community vision. Regulatory tools and policies that support the vision help send this message, but direct financial incentives in key catalytic projects provide a “proof of concept”. Strategic investments in such projects can ultimately lead to increased value in the market and eventually allow for private investment without public support over time.

Current market conditions are not supportive of many development forms that are envisioned for the Southwest Corridor. In particular this is true in areas that aspire to a higher level of amenity than what exists today. The tools below are recommended for consideration by public sector partners in areas of change throughout the Southwest Corridor to help leverage investment and new development.

- Vertical Housing Program
- Brownfield Remediation Funds
- System Development Charges Strategies
- Urban Renewal
- Grant programs (e.g., Metro’s Transit-Oriented Development Program)
- Affordable housing incentives

Corridor-wide policy

The Southwest Corridor refinement process should include a scope element to work in partnership with the Southwest Corridor cities, Washington County and ODOT to develop a coordinated set of multi-modal performance measures that reflect state, regional and local goals. The multi-modal performance measures may vary across the corridor based on community objectives, and should provide the objectivity necessary for fair and consistent application. The measures would be intended to support both land use review and transportation evaluation. The scope of the alternative performance measures development would likely include Interstate 5 and Highway 99W within the Southwest Corridor, and Tualatin-Sherwood Road in the Tualatin and Sherwood Town Center areas, although the boundaries of application could vary from these limits. The intended work product would develop a set of multi-modal performance measures and associated evaluation process. This product could subsequently be considered for adoption by jurisdictions throughout the region, including Metro and the Oregon Transportation Commission.

Strategic Investment Strategy action chart

July action	Responsibility for implementation					Target date for next steps (if applicable)
	Who implements		When	Funding for work	Notes	
	Lead	Partners				
Decision to refine HCT alternatives for further study: 1. Level of BRT 2. Modes for further study 3. Destination	Metro/TriMet	Cities, counties, ODOT	8/2013 – 6/2014	MTIP – Metro	Early 2014 SC agreement: 1. Refined HCT project 2. Collaborative funding plan for DEIS 3. Preliminary funding strategy for HCT project	Mid 2014: Begin Draft Environmental Impact Statement (DEIS) on HCT alternative as refined by project partners Early 2017: Target end date for DEIS and Locally Preferred Alternative decision
Southwest Service Enhancement Plan	TriMet/Metro	Cities	8/2013 – 12/2014	TriMet w/ some Metro staff support	Vision for future transit service throughout the area, including connections to HCT. Long-term enhancements will be guided by TriMet's financial capacity and by local jurisdiction access improvements	2015: Implement service enhancements and revisit over time based on local improvements
Southwest Corridor Alternative Performance Measures	ODOT	Cities, Washington County, Metro	8/2013 – 6/2014	ODOT	Coordinate work during refinement of HCT alternative	
Policies and incentives to address regulatory framework and catalyst investments	Cities	Metro	Timing depends on jurisdiction and direct connection to HCT	Cities	Milestones for specific cities will be tied to progress on HCT project with an aim to address FTA guidelines and help the region compete for federal transit funds	Spring 2014: Define specific policy considerations for project partners to pursue in coordination with DEIS and development of a Locally Preferred Alternative
Roadway/AT projects highly supportive of HCT	Metro/TriMet	ODOT, cities, counties	8/2013 – 6/2014	Metro	During refinement some projects will be determined to fit with HCT project as refined	Mid 2014: Partners will define which projects are packaged with the HCT alternative for NEPA
Roadway/AT projects highly supportive of corridor land use vision	Cities, counties, ODOT		As funding becomes available	Project sponsor	Project sponsors will take responsibility to implement their projects with some collaborative efforts to seek funding, particularly for projects identified as early opportunities; project sponsors actions may include project design and engineering, public outreach and working with regional partners to include the project in the Regional Transportation Plan	
Parks and natural resource projects	Cities, counties, Metro	Parks, environmental agencies and non-profits	8/2013 – 6/2014 for projects related to HCT	Project sponsor and Metro will look at projects that could be part of HCT alternative	Project partners will take responsibility to implement their projects and work collaboratively to seek grant opportunities and other funding	Mid 2014: Identify projects that may be part of HCT alternative for NEPA
