TUALATIN CITY COUNCIL

Monday, APRIL 23, 2018

JUANITA POHL CENTER
8513 SW Tualatin Road
Tualatin, OR 97062

WORK SESSION- Cancelled
BUSINESS MEETING begins at 7:00 p.m.

Mayor Lou Ogden

Council President Joelle Davis

Councilor Robert Kellogg **Councilor Frank Bubenik**
Councilor Paul Morrison **Councilor Nancy Grimes**
Councilor Jeff DeHaan

Welcome! By your presence in the City Council Chambers, you are participating in the process of representative government. To encourage that participation, the City Council has specified a time for your comments on its agenda, following Announcements, at which time citizens may address the Council concerning any item not on the agenda or to request to have an item removed from the consent agenda. If you wish to speak on a item already on the agenda, comment will be taken during that item. Please fill out a Speaker Request Form and submit it to the Recording Secretary. You will be called forward during the appropriate time; each speaker will be limited to three minutes, unless the time limit is extended by the Mayor with the consent of the Council.

Copies of staff reports or other written documentation relating to each item of business referred to on this agenda are available for review on the City website at www.tualatinoregon.gov/meetings, the Library located at 18878 SW Martinazzi Avenue, and on file in the Office of the City Manager for public inspection. Any person with a question concerning any agenda item may call Administration at 503.691.3011 to make an inquiry concerning the nature of the item described on the agenda.

In compliance with the Americans With Disabilities Act, if you need special assistance to participate in this meeting, you should contact Administration at 503.691.3011. Notification thirty-six (36) hours prior to the meeting will enable the City to make reasonable arrangements to assure accessibility to this meeting.

Council meetings are televised *live* the day of the meeting through Washington County Cable Access Channel 28. The replay schedule for Council meetings can be found at www.tvctv.org. Council meetings can also be viewed by live *streaming video* on the day of the meeting at www.tualatinoregon.gov/meetings.

Your City government welcomes your interest and hopes you will attend the City of Tualatin Council meetings often.

PROCESS FOR LEGISLATIVE PUBLIC HEARINGS

A ***legislative*** public hearing is typically held on matters which affect the general welfare of the entire City rather than a specific piece of property.

1. Mayor opens the public hearing and identifies the subject.
2. A staff member presents the staff report.
3. Public testimony is taken.
4. Council then asks questions of staff, the applicant, or any member of the public who testified.
5. When the Council has finished questions, the Mayor closes the public hearing.
6. When the public hearing is closed, Council will then deliberate to a decision and a motion will be made to either *approve*, *deny*, or *continue* the public hearing.

PROCESS FOR QUASI-JUDICIAL PUBLIC HEARINGS

A ***quasi-judicial*** public hearing is typically held for annexations, planning district changes, conditional use permits, comprehensive plan changes, and appeals from subdivisions, partititions and architectural review.

1. Mayor opens the public hearing and identifies the case to be considered.
2. A staff member presents the staff report.
3. Public testimony is taken:
    a) In support of the application
    b) In opposition or neutral
4. Council then asks questions of staff, the applicant, or any member of the public who testified.
5. When Council has finished its questions, the Mayor closes the public hearing.
6. When the public hearing is closed, Council will then deliberate to a decision and a motion will be made to either *approve*, *approve with conditions*, or *deny the application*, or *continue* the public hearing.

TIME LIMITS FOR PUBLIC HEARINGS

The purpose of time limits on public hearing testimony is to provide all provided all interested persons with an adequate opportunity to present and respond to testimony. All persons providing testimony **shall be limited to 3 minutes**, subject to the right of the Mayor to amend or waive the time limits.

EXECUTIVE SESSION INFORMATION

An Executive Session is a meeting of the City Council that is closed to the public to allow the City Council to discuss certain confidential matters. An Executive Session may be conducted as a separate meeting or as a portion of the regular Council meeting. No final decisions or actions may be made in Executive Session. In many, but not all, circumstances, members of the news media may attend an Executive Session.

The City Council may go into Executive Session for certain reasons specified by Oregon law. These reasons include, but are not limited to: ORS 192.660(2)(a) employment of personnel; ORS 192.660(2)(b) dismissal or discipline of personnel; ORS 192.660(2)(d) labor relations; ORS 192.660(2)(e) real property transactions; ORS 192.660(2)(f) information or records exempt by law from public inspection; ORS 192.660(2)(h) current litigation or litigation likely to be filed; and ORS 192.660(2)(i) employee performance of chief executive officer.

OFFICIAL AGENDA OF THE TUALATIN CITY COUNCIL MEETING FOR APRIL 23, 2018

A. CALL TO ORDER

Pledge of Allegiance

B. ANNOUNCEMENTS

1. Proclamation Declaring the Week of April 22 – April 28, 2018 as Volunteer Appreciation Week in the City of Tualatin

2. Proclamation Declaring the Week of May 6-12, 2018 as Public Service Recognition Week in the City of Tualatin

3. New Employee Introduction- Tabitha Boschetti, Assistant Planner

4. New Employee Introduction- Casey Fergeson, Project Engineer

5. New Employee Introduction- Quinn Wolf, Water Division-Utility Technician I

C. CITIZEN COMMENTS

This section of the agenda allows anyone to address the Council regarding any issue not on the agenda, or to request to have an item removed from the consent agenda. The duration for each individual speaking is limited to 3 minutes. Matters requiring further investigation or detailed answers will be referred to City staff for follow-up and report at a future meeting.

D. CONSENT AGENDA

The Consent Agenda will be enacted with one vote. The Mayor will ask Councilors if there is anyone who wishes to remove any item from the Consent Agenda for discussion and consideration. If you wish to request an item to be removed from the consent agenda you should do so during the Citizen Comment section of the agenda. The matters removed from the Consent Agenda will be considered individually at the end of this Agenda under, Items Removed from the Consent Agenda. The entire Consent Agenda, with the exception of items removed from the Consent Agenda to be discussed, is then voted upon by roll call under one motion.

1. Consideration of Approval of the Minutes for the Work Session and Regular Meeting of April 9, 2018

2. Consideration of Approval of 2018 Liquor License Renewals-Late Submittals

3. Consideration of **Resolution No. 5363-18** Awarding the Contract for the C-1 Reservoir Rehabilitation Project to CBI Services, LLC and Authorizing the City Manager to Execute a Contract

4. Consideration of **Resolution No. 5358-18** Granting a Conditional Use Permit with Conditions for a Fire Station Use in the Light Manufacturing (ML) Planning District on Land adjacent to 7100 SW McEwan Road (Tax Map 2S1 13DD, Tax Lot 1601) (CUP-17-0002)

E. SPECIAL REPORTS

1. Annual Report for the Tualatin Library Advisory Committee

2. Update on Tualatin Ballot Measure 34-282 Public Information Efforts

F. PUBLIC HEARINGS – *Quasi-Judicial*

1. Request for Review of MAR17-0041, Tualatin Professional Center Driveway Adjustment Land Use Decision Located at 6464 SW Borland Road

G. ITEMS REMOVED FROM CONSENT AGENDA

Items removed from the Consent Agenda will be discussed individually at this time. The Mayor may impose a time limit on speakers addressing these issues.

ANNOUNCEMENTS

Proclamation Declaring the Week of April 22 – April 28, 2018 as Volunteer Appreciation Week in the City of Tualatin

SUMMARY

Volunteers serve throughout the City – in our Parks, the Library, at Special Events, on Boards and Commissions, in other City departments - as Reserve Police Officers and Interns, and more. In 2017 the City received 21,000 hours of donated time from over 2,000 volunteers. These volunteers were honored at a reception help in their honor and this proclamation deems this week as Volunteer Appreciation Week in the City of Tualatin.

Proclamation Vol Week 2018

Proclamation

Declaring the Week of April 22 – April 28, 2018 as
Volunteer Appreciation Week
in the City of Tualatin

WHEREAS, the entire community can inspire, equip and mobilize people to take action that changes the world; and

WHEREAS, in 2017 over 2,000 volunteers contributed approximately 21,000 hours of their time, an equivalent of about 10 full time employees, to the betterment of our community; and

WHEREAS, volunteers give freely of their time, talents, and energy, and ask only for a thank you for their countless hours of service; and

WHEREAS, it has been a long standing tradition in our community for individuals, families, and local businesses to volunteer to make a difference in our community; and

WHEREAS, it is fitting to recognize our volunteers for their dedicated service;

NOW, THEREFORE, BE IT PROCLAIMED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, Oregon that:

Section 1. The week of April 22 – April 28, 2018, to be proclaimed "Volunteer Appreciation Week" in the City of Tualatin.

Section 2. The City of Tualatin takes great pleasure in honoring the volunteers of our community and conveying our sincere gratitude and appreciation for their committed, selfless, and compassionate efforts; our volunteers truly Make Magic Happen!

INTRODUCED AND ADOPTED this 23rd day of April, 2018.

---

ANNOUNCEMENTS

Proclamation Declaring the Week of May 6-12, 2018 as Public Service Recognition Week in the City of Tualatin

SUMMARY

Public Service is an honorable calling that involves a wide variety of challenging and rewarding professions, including providing recreational services, maintaining public safety, improving transportation, protecting our environment, and performing administrative and management activities which are essential to efficient and effective operation of government. This proclamation recognizes the service of our employees by recognizing the week of May 6 - 12, 2018 as Public Service Recognition Week in the City of Tualatin.

Proclamation

Proclamation

Declaring the Week of May 6 – May 12, 2018 as
"Public Service Recognition Week"

In Honor of the Public Employees of the City of Tualatin

WHEREAS, public service is an honorable calling that involves a wide variety of challenging and rewarding professions, including providing recreational services, maintaining public safety, improving transportation, protecting our environment, and performing administrative and management activities which are essential to efficient and effective operation of government; and

WHEREAS, Tualatin's city employees contribute significantly to the quality of life for the Tualatin community, with their commitment to excellence, high ethical standards, and diversity of skills; and

WHEREAS, excellence in the delivery of public service helps keep Tualatin strong, prosperous, and a wonderful place in which to live, work, play and volunteer; and

WHEREAS, this commemoration provides an opportunity to express our appreciation for the many contributions public employees make to our daily lives.

NOW, THEREFORE, IT IS PROCLAIMED by the Tualatin City Council that the week of May 6-12, 2018 be Public Service Recognition Week in the City of Tualatin and the Council encourages all citizens to recognize the accomplishments and contributions of public employees.

INTRODUCED AND ADOPTED this 23rd day of April, 2018.

STAFF REPORT
CITY OF TUALATIN

TO: Honorable Mayor and Members of the City Council

THROUGH: Sherilyn Lombos, City Manager

FROM: Nicole Morris, Deputy City Recorder

DATE: 04/23/2018

SUBJECT: Consideration of Approval of the Minutes for the Work Session and Regular Meeting of April 9, 2018

ISSUE BEFORE THE COUNCIL:

The issue before the Council is to approve the minutes for the Work Session and Regular Meeting of April 9, 2018.

RECOMMENDATION:

Staff respectfully recommends that the Council adopt the attached minutes.

Attachments:

STAFF REPORT
CITY OF TUALATIN

TO: Honorable Mayor and Members of the City Council

THROUGH: Sherilyn Lombos, City Manager

FROM: Nicole Morris, Deputy City Recorder

DATE: 04/23/2018

SUBJECT: Consideration of Approval of 2018 Liquor License Renewals-Late Submittals

---

ISSUE BEFORE THE COUNCIL:

The issue before the Council is to approve liquor license renewal applications for 2018. The business listed below submitted their 2018 renewal application too late to be included in the renewals approved at the April 26, 2018 Council meeting. Copies have not been included with this staff report but are available at the City Offices for review.

RECOMMENDATION:

Staff respectfully recommends the Council approve endorsement of the following liquor license application renewal for 2018:

LaSen Vietnamese Grill

EXECUTIVE SUMMARY:

Annually the Oregon Liquor Control Commission (OLCC) requires all liquor licenses be renewed. According to the provisions of City Ordinance No. 680-85, establishing procedures for liquor license applicants, applicants are required to fill out a City application form, from which a review by the Police Department is conducted, according to standards and criteria established in Section 6 of the ordinance. The liquor license renewal applications are in accordance with all ordinances and the Police Department has conducted reviews of the applications.

According to the provisions of Section 5 of Ordinance No. 680-85 a member of the Council or the public may request a public hearing on any of the liquor license renewal requests. If such a public hearing request is made, a hearing will be scheduled and held on the license. It is important that any request for such a hearing include reasons for said hearing.

FINANCIAL IMPLICATIONS:

A renewal fee of $35 has been paid by the applicant.

Jeff Fuchs, Public Works Director/City Engineer

DATE: 04/23/2018

SUBJECT: Consideration of **Resolution No. 5363-18** Awarding the Contract for the C-1 Reservoir Rehabilitation Project to CBI Services, LLC and Authorizing the City Manager to Execute a Contract

---

ISSUE BEFORE THE COUNCIL:

Award the construction contract for the C-1 Reservoir Rehabilitation Project.

RECOMMENDATION:

Staff recommends that Council approve the resolution to allow the City Manager to execute a contract with CBI Services, LLC to construct the C-1 Reservoir Rehabilitation Project in the amount of $1,030,000.00.

EXECUTIVE SUMMARY:

The project will replace the existing C-1 Reservoir roof and top two rings (steel wall sections), repaint the interior and exterior coatings, and re-install associated appurtenances such as the interior and exterior ladders. Miscellaneous maintenance work will also be completed on C-2 Reservoir under this contract.

In 2015, the City of Tualatin constructed the C-2 Reservoir. As part of that project, the nearby C-1 Reservoir was planned to be recoated (primer and finish coat). However, when the reservoir was drained to perform this coating work, the roof structure was highly corroded and structurally compromised. Staff postponed the coating of C-1 Reservoir to further assess the extent of the corrosion.

In June 2017, the City entered into a contract with CH2M Hill for engineering services through design and construction for replacement of the C-1 Reservoir roof structure. During design, a structural assessment of the walls was completed and it was determined the top two rings needed to be replaced as well due to corrosion.

The project was advertised in the Daily Journal of Commerce on February 12th and 14th, 2018. Two (2) bids were received prior to the close of the bid period on March 21st, 2018. CBI

Services, LLC submitted the lowest responsible bid for the project in the amount of $1,030,000.00.

FINANCIAL IMPLICATIONS:

Funds for this project are available in the Water Operating Fund. Staff anticipates spending $100,000 in the current fiscal year and the remaining $930,000 will be budgeted in FY 18/19.

Attachments: Resolution

RESOLUTION NO. 5363-18

A RESOLUTION AWARDING THE CONTRACT FOR THE C-1 RESERVOIR REHABILITATION PROJECT

WHEREAS, the project was advertised in the *Daily Journal of Commerce* on February 12th and 14th, 2018; and

WHEREAS, two (2) bids were received prior to the close of the bid period on March 21st, 2018; and

WHEREAS, CBI Services, LLC submitted the lowest bid for the project in the amount of $1,030,000; and

WHEREAS, there are funds budgeted for this project in the Water Operating Fund.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, OREGON, that:

Section 1. The contract is awarded to CBI Services, LLC.

Section 2. The City Manager is authorized to execute a contract with CBI Services, LLC in the amount of $1,030,000.00.

Section 3. The City Manager, or the City Manager's designee, is authorized to execute Change Orders totaling up to 10% of the original contract amount.

Section 4. This resolution is effective upon adoption.

Adopted by the City Council this 23rd day of April, 2018.

DATE: 04/23/2018

SUBJECT: Consideration of **Resolution No. 5358-18** Granting a Conditional Use Permit with Conditions for a Fire Station Use in the Light Manufacturing (ML) Planning District on Land adjacent to 7100 SW McEwan Road (Tax Map 2S1 13DD, Tax Lot 1601) (CUP-17-0002)

ISSUE BEFORE THE COUNCIL:

Consideration of Resolution No. 5358-18 Granting a Conditional Use Permit with Conditions for a Fire Station Use in the Light Manufacturing (ML) Planning District on Land adjacent to 7100 SW McEwan Road (Tax Map 2S1 13DD, Tax Lot 1601) (CUP-17-0002).

RECOMMENDATION:

Staff recommends Council consider Resolution No. 5358-18.

EXECUTIVE SUMMARY:

Resolution No. 5358-18 grants a Conditional Use Permit, with conditions, for CUP 17-002 to allow Tualatin Valley Fire & Rescue (TVF&R) to operate a Fire Station adjacent to 7100 SW McEwan Road (Tax Map 2S1 13DD, Tax Lot 1601).

On April 9, 2018, Council held a quasi-judicial public hearing to consider approval of a Conditional Use Permit application filed by TVF&R (CUP -17-0002). At the public hearing, Council heard and considered the testimony and evidence presented on behalf of the Applicant, City staff, and those appearing at the public hearing. After hearing the testimony and argument, Council closed the public hearing, deliberated, and voted to grant the Conditional Use Permit with conditions. No procedural or other objections were voiced by any party.

The Findings and Conclusions in support of the decision are contained in Exhibit A to Resolution No. 5358-18. The Application filed by TVF&R is attached as Exhibit B to Resolution No. 5358-18.

Attachments: Reso 5358-18 - CUP TVFR
Exhibit A - Analysis and Findings Reso 5358-18
Exhibit B - CUP App Reso 5358-18

RESOLUTION NO. 5358-18

A RESOLUTION GRANTING A CONDITIONAL USE PERMIT WITH CONDITIONS FOR FIRE STATION USE IN THE LIGHT MANUFACTURING (ML) PLANNING DISTRICT ON LAND ADJACENT TO 7100 SW MCEWAN ROAD (TAX MAP 2S1 13DD, TAX LOT 1601) (CUP-17-0002).

WHEREAS, Tualatin Valley Fire & Rescue (TVF&R) submitted an application with the City for a conditional use permit, for property located adjacent to 7100 SW McEwen Road, Tualatin, Oregon, 98062 (Tax Map 2S1 13DD, Tax Lot 1601);

WHEREAS, the Council held a quasi-judicial public hearing on April 9, 2018 to consider the application;

WHEREAS, notice of public hearing was given as required by the Tualatin Development Code 31.064;

WHEREAS, the Council heard and considered the testimony and evidence presented on behalf of the applicant, the City staff, and those appearing at the public hearing; and

WHEREAS, after the conclusion of the public hearing the Council voted to approve the application (with conditions).

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TUALATIN, OREGON, that:

Section 1. Findings. The Council adopts as its findings the Analysis *and Findings* attached as Exhibit A, and is incorporated by reference.

Section 2. Conditions. The Conditional Use Permit (CUP-17-0002) for Tualatin Valley Fire & Rescue (TVF&R), attached as Exhibit B, and incorporated by reference, is approved with the following conditions:

A. The approval of Conditional Use Permit 17-0002 does not approve any site redevelopment or exterior building modifications, and the applicant must obtain approval from the City for any site or exterior modifications, pursuant to TDC 73.040(1) and TDC 73.100(1) and (2).

B. The applicant must operate the use consistent with all application materials submitted to the City dated December 2017 (City stamp reads December 8, 2017).

C. The applicant must comply with the noise standards in TDC 60.085.

D. The applicant must—separately from the CUP—submit any sign permit applications pursuant to and in compliance with TDC Chapter 38.

E. The approval period is pursuant to TDC 32.090 Automatic Termination of Conditional Use as reproduced:

(1) Unless otherwise provided by the Council in the resolution granting approval of the conditional use permit, a conditional use permit shall automatically become null and void two years after the effective date upon which it was granted unless one of the following events occur:

(a) The applicant or his successor in interest has secured a building permit within said two-year period, if a building permit is required, and has actually commenced construction of the building or structure authorized by the permit within said two-year period.

(b) The applicant or his successor in interest has commenced the activity or installation of the facility or structure authorized by the conditional use permit within said two-year period.

(2) The applicant may submit a written request to the City Council for an extension of time on the conditional use permit to avoid the permit's becoming null and void. The request for extension must be submitted prior to the expiration of the times established by Subsection (1) above. The City Council may, in the resolution granting such conditional use permit, provide for an extension of time beyond 1 year.

F. The applicant must comply with all applicable TDC policies and regulations.

Section 3. This resolution is effective upon adoption.

Adopted by the City Council this 23rd day of April, 2018.

Exhibit A to
Resolution No. 5358-18

TVF&R USE FOR NEW FIRE STATION 39

CONDITIONAL USE PERMIT APPLICATION (CUP-17-0002)

ANALYSIS AND FINDINGS

The issue before the City Council is consideration of a conditional use permit for a fire station use (Station 39) operated by Tualatin Valley Fire & Rescue (TVF&R) adjacent to 7100 SW McEwan Road (Tax Map 2S1 13DD, Tax Lot 1601).

In order to grant the proposed Conditional Use Permit, the request must meet the approval criteria of Tualatin Development Code (TDC) Section 32.030. The applicant prepared a narrative that addresses the criteria, which is within the application materials (Attachment B), and staff has reviewed this and other application materials and included pertinent excerpts below.

The following materials and descriptions are based largely on the applicant's narrative; staff has made some minor edits. Staff comments, findings, and conditions of approval are in Italic font.

(1) The use is listed as a conditional use in the underlying planning district.

Applicant Response: Station 39 is located in the ML zoning district. As noted in TDC Section 60.040(1)(f), a Fire Station is permitted in the ML zone as a Conditional Use.

Staff finds that Criterion 1 is met.

(2) The characteristics of the site are suitable for the proposed use, considering size, shape, location, topography, existence of improvements, and natural features.

Applicant Response:

Size: The site characteristics are compatible with other TVF&R stations throughout the District. The site size (1.16 acres) is consistent with comparable TVF&R stations and can accommodate the building program for Station 39.

Staff finds that the site size is suitable for the use.

Shape: *The applicant did not provide a response specific to the shape of the property. The site is generally rectangular. The applicant has provided a conceptual site plans to show that the proposed use could be accommodated on the property.*

Location: TVF&R has identified the location as an appropriate location to meet required service response standards and needs of the District. It's location near Interstate 5 will provide quick response to incidents on the freeway as well as quick emergency response to the surrounding community. TVF&R's Station 34 is located in the City of Tualatin but is on the westside of Interstate 5 just off Tualatin Sherwood Road (19365 SW 90th Court). Station 39's location on the eastside of Interstate 5 will significantly enhance response times for emergency services, making this location very suitable for the proposed use.

Staff finds that the location is suitable for the use. The property is located in an industrial area and surrounded by a storage facility and medical office uses, which are compatible with the proposed fire station use.

Topography: There are no topographic or natural features on the site that will impact construction of the Station 39.

Staff finds that the topography is suitable for the proposed use.

Improvements: *The applicant did not provide a response to the existing improvements on the site. The project site is a park-like green space within property that was formerly part of the U-Haul site and is surrounded on three sides by the remaining U-Haul business. The site features all utilities in the fully improved street that fronts the project site. Staff finds that the improvements on the site are appropriate for the proposed use.*

Natural Features: There are no topographic or natural features on the site that will impact construction of the Station 39.

Staff finds that—with the exception of on-site landscaping that includes trees and taller shrubs—there are no natural features on the subject site and the proposed use will not affect natural features.

As noted, the Conditional Use Permit does not authorize any construction and only analyzes the use on the site. No construction or site modifications are directly resulting from this permit. It is understood that approval of this Conditional Use Permit does not approve any site redevelopment or exterior building designs, and that after Conditional Use Permit approval is obtained, the applicant will seek approval from the City pursuant to TDC 73.040(1) and TDC 73.100 (1) and (2) for Architectural Review.

Staff finds that the following condition of approval is required to meet Criterion 2:

Condition of Approval No. 1: The approval of Conditional Use Permit 17-0002 does not approve any site redevelopment or exterior building modifications, and the applicant shall obtain approval from the City for any site or exterior designs, pursuant to TDC 73.040(1) and TDC 73.100(1) and (2).

(3) The proposed development is timely, considering the adequacy of transportation systems, public facilities, and services existing or planned for the area affected by the use.

Applicant Response:

Transportation Systems

The construction of the proposed Station 39 is funded through General Fund and a Local Option Levy approved by District voters in 2014 to upgrade and improve the safety and operations of TVF&R's fire stations. TVF&R identified the need for a station in this location to ensure quick response times in the future as development continues in Tualatin, Lake Oswego, and Tigard. Public services are immediately available to the site. As noted in the Traffic Impact Analysis submitted with this application, Station 39 traffic will not adversely impact the existing transportation system. The analysis notes that Station 39 will generate a small number of daily trips that can easily be accommodated on the transportation system.

Access to the subject site will be from SW McEwan which is generally improved and appropriate for the use, though additional improvements may be required during the Architectural Review phase. .

Off-Street Parking

The applicant did not address parking specifically. Section 73.370 of the TDC explains how many spaces are required for specific uses. A Fire Station use is not listed. In the event that a use is not listed,

subsection 1.g explains that the Community Development Director will compare the use to other uses to determine the appropriate number of parking spaces needed. Again, the intent of this evaluation is to determine the appropriateness of the site for the proposed conditional use, a fire station; actual review of the spaces will be determined with the Architectural Review. The applicant has provided a conceptual site plan that shows parking that has been designed similar to the needs of other fire stations in the TVF&R system. The site plan suffices, for the purposes of a CUP, to demonstrate the site is suitable. Staff finds that the off-street parking conditions are suitable for the proposed use.

Public Facilities and Services

The applicant did not specifically address the public facilities available at the site. Through evaluation with the City engineering staff, it has been determined that the site has full utilities available in the fronting street except storm water. The conceptual site plan includes a detention basin for purposes of storm water, thus illustrating that the site is suitable for the use. Staff finds that the existing and proposed public facilities and services are adequate to service the proposed use.

Staff finds that Criterion 3 is met.

(4) The proposed use will not alter the character of the surrounding area in any manner, which substantially limits, impairs, or precludes the use of surrounding properties for the primary uses listed in the underlying Planning District.

Applicant Response: The location of Station 39 will allow uses on the property immediately adjacent to Station 39 to continue operating and will not limit or preclude the use of surrounding property. As can be seen on the attached Station 39 site plan, TVF&R will take direct access to SW McEwan Road and will not impede or conflict with access to surrounding properties. The Traffic Impact Analysis submitted with this application indicates that Station 39 traffic will not adversely impact the existing transportation system. The analysis notes that Station 39 will generate a small number of daily trips that can easily be accommodated on the transportation system.

The site plan also notes how stormwater will be accommodated on-site and in a manner that will not impact adjacent properties. As well landscaping provided with the project will create a visual buffer between Station 39 and adjacent properties.

The emergency services use is not out of character with surrounding land uses in the ML zone. Medical offices are located across SW McEwan from Station 39. As can be seen from the building elevations submitted with this application Station 39 will be an appropriate design and will not be out of character with existing industrial and office buildings on surrounding properties.

The use (fire station) being proposed for Conditional Use approval will not alter the character of the surrounding area in any manner that substantially limits, impairs, or precludes the use of surrounding properties for the primary uses listed in the underlying planning district (Light Manufacturing - ML). The new station will be constructed on a legal tax lot (2S1 13 DD TL 1601) – see Exhibit 5 in the Application Appendix. As noted, existing properties in the surrounding area are a mix of industrial, office and vehicle storage. A fire station as a use is compatible with these types of uses from an operational and design perspective.

In response to staff comments, the applicant understands their concern that the physical nature of the new tax lot may raise issues about the use of the adjacent northern triangle of the U-Haul property. The use of the northern triangle for the cell tower will not be impacted, but there will be reduced parking. However, the parking issue is being addressed separately through the land acquisition and

compensation process the District has followed to secure the property and would be present whether or not a new fire station was constructed on Tax Lot 1601. The parcel could remain vacant and fenced and the concerns staff has expressed would remain. Staff concerns about the new parcel potentially impeding use of the northern parking area is not a use compatibility issue, which is the intent of the Conditional Use review and the focus of the decision criteria. The concern that's raised would exist regardless of the use proposed or if the District was proposing nothing at all on their property.

Staff notes that the proposed use would not alter the overall character of the immediate area defined by the properties abutting the site. In looking at the design of the station, as shown in the materials submitted for the CUP, it would seem that the station would eliminate several parking spaces from the existing conditions enjoyed by U-Haul. However, it is important to understand that the loss of the spaces was the result of the condemnation of the property, not the conditional use permit.

Staff finds that Criterion 4 is met.

(5) The proposal will satisfy those objectives and policies of the Tualatin Community Plan which apply to the proposed use.

The Tualatin Community Plan, which is the City comprehensive plan, is integrated within the Tualatin Development Code (TDC) as Chapters 1-30. Based on discussions with City of Tualatin staff, the following two sections of the TDC are applicable to the proposed use:

A. Section 7.040 Manufacturing Planning District Objectives.

This section describes the purpose of each manufacturing planning district.

(2) Light Manufacturing Planning District (ML)

(a) Suitable for warehousing, wholesaling and light manufacturing processes that are not hazardous and that do not create undue amounts of noise, dust, odor, vibration, or smoke. Also suitable, with appropriate restrictions, are the retail sale of products not allowed for sale in General Commercial areas, subject to the Special Commercial Setback from arterial streets and Commercial Services Overlay as generally illustrated in Map 9-5 and specifically set forth in TDC 60.035, and office commercial uses where any portion of a legally created lot is within 60 feet of a CO Planning District boundary. Also suitable is the retail sale of products manufactured, assembled, packaged or wholesaled on the site provided the retail sale area, including the showroom area, is no more than 5% of the gross floor area of the building not to exceed 1,500 square feet. Also suitable for the retail sale of home improvement materials and supplies provided it is not greater than 60,000 square feet of gross floor area per building or business and subject to the Special Commercial Setback from arterial streets as generally illustrated in Map 9-5 and specifically set forth in TDC 60.035. Rail access and screened open storage allowed in these areas will conform to defined architectural, landscape and environmental design standards.

B. Chapter 60: Light Manufacturing Planning District (ML)

Section 60.010 Purpose.

> The purpose of this district is to provide areas of the City that are suitable for industrial uses and compatible with adjacent commercial and residential uses. The district serves to buffer heavy manufacturing uses from commercial and residential areas. The district is suitable for warehousing, wholesaling, and light manufacturing processes that are not hazardous and do not create undue amounts of noise, dust, odor, vibration, or smoke. The district is also suitable for retail sale of products manufactured, assembled, packaged or wholesaled on the site provided the retail sale area, including the showroom area, is no more than 5% of the gross floor area of the building not to exceed 1,500 square feet and, with appropriate restrictions, for retail sale of products not allowed for sale in General Commercial Planning Districts, and office commercial uses where any portion of a legally created lot is within 60 feet of a CO Planning District boundary. Railroad access and screened outdoor storage will be allowed in this district, conforming to defined architectural, landscape, and environmental design standards. In accordance with the Industrial Business Park Overlay District, TDC Chapter 69, and TDC 60.037-60.038 selected small-scale mixed uses that are supportive of and secondary to industrial uses are allowed to provide services to businesses and employees. The purpose is also to allow certain commercial service uses in the Commercial Services Overlay shown in the specific areas illustrated on Map 9-5 and selected commercial uses subject to distance restrictions from residential areas and subject to the Special Commercial Setback from arterial streets as generally illustrated in Map 9-5 and specifically set forth in TDC 60.035.

Locating TVF&R Station 39 in the ML district is appropriate. As noted in TDC Section 60.040(1)(f), a Fire Station is permitted in the ML zone as a Conditional Use. The use is not hazardous and will not create undue amounts of noise, dust, odor, vibration, or smoke. Any noise generated will be limited. Station 39 will not require sirens to sound at or near the site. Fire personnel are not required to sound sirens when leaving the station, the lights on the apparatus normally are sufficient to stop traffic. The only time the fire apparatus operators would be required to use their sirens would be when they pass through a traffic signal. Regardless, there are no noise sensitive uses near the site.

The City's comprehensive plan is designed to promote public health, safety, and welfare. Providing opportunities for emergency services to operate within the City is a critical aspect of community health, safety, and welfare. As noted earlier, locating Station 39 at this site will allow TVF&R to achieve their emergency services response times. As well, the Traffic Impact Analysis submitted with this application indicates that Station 39 traffic will not adversely impact the existing transportation system. The analysis notes that Station 39 will generate a small number of daily trips that can easily be accommodated on the transportation system.

Staff additionally finds that Section 32.030 Criteria for Conditional uses applies. The purpose for this section states:

> *The City Council may allow a conditional use, after a hearing conducted pursuant to TDC 32.070, provided that the applicant provides evidence substantiating that all the requirements of this Code relative to the proposed use are satisfied.*

The Analysis and Findings included in this document address the five (5) identified criteria listed in Section 32.030 to aid in the City Council decision on whether or not a proposed conditional use meets applicable TDC requirements.

Staff finds that the following conditions of approval are required to meet Criterion 5:

Condition of Approval No. 2: The applicant shall operate the use consistent with all application materials submitted to the City dated December 2017 (City stamp reads December 8, 2017).

Condition of Approval No. 3: The applicant shall comply with the noise standards in TDC 60.085.

Condition of Approval No. 4: The applicant shall—separately from the CUP—submit any sign permit applications pursuant to and in compliance with TDC Chapter 38.

Condition of Approval No. 5: The approval period shall be pursuant to TDC 32.090 Automatic Termination of Conditional Use as reproduced:

(1) Unless otherwise provided by the Council in the resolution granting approval of the conditional use permit, a conditional use permit shall automatically become null and void two years after the effective date upon which it was granted unless one of the following events occur:

(a) The applicant or his successor in interest has secured a building permit within said two-year period, if a building permit is required, and has actually commenced construction of the building or structure authorized by the permit within said two-year period.

(b) The applicant or his successor in interest has commenced the activity or installation of the facility or structure authorized by the conditional use permit within said two-year period.

(2) The applicant may submit a written request to the City Council for an extension of time on the conditional use permit to avoid the permit's becoming null and void. The request for extension must be submitted prior to the expiration of the times established by Subsection (1) above. The City Council may, in the resolution granting such conditional use permit, provide for an extension of time beyond 1 year.

Condition of Approval No. 6: The applicant shall comply with all applicable TDC policies and regulations.

SUMMARY OF ANALYSIS AND FINDINGS

Based on the application materials, conditions of approval, and the analysis and findings presented above, staff finds that CUP-17-0002 meets all criteria of TDC 32.030 “Criteria for Review of Conditional Uses.”

CONDITIONAL USE PERMIT
CERTIFICATION OF SIGN POSTING

The applicant shall provide and post a sign pursuant to Tualatin Development Code (TDC) 31.064(2). Additionally, the 18" x 24" sign must contain the application number, and the block around the word "NOTICE" must remain **lime green** composed of the **RGB color values Red 146, Green 208, and Blue 80**. Additionally, the potential applicant must provide a flier (or flyer) box on or near the sign and fill the box with brochures reiterating the meeting info and summarizing info about the potential project, including mention of anticipated land use application(s). Staff has a Microsoft PowerPoint 2007 template of this sign design available through the Planning Division homepage at < www.tualatinoregon.gov/planning/land-use-application-sign-templates>.

As the applicant for the TVF&R Station 39 (CUP 17-0002) project, I hereby certify that on this day, January 4, 2018 sign(s) was/were posted on the subject property in accordance with the requirements of the Tualatin Development Code and the Community Development Department - Planning Division.

Executive Summary

1. The Tualatin Valley Fire & Rescue Station #39 – Rivergrove, has been proposed for development on a property located near 7100 SW McEwan Road in Tualatin, Oregon.
2. The trip generation calculations show that the proposed development is projected to generate twelve site trips during the morning peak hour and four site trips during the evening peak hour.
3. No significant trends or crash patterns were identified at any of the study intersections. Accordingly, no specific safety mitigation is recommended.
4. Adequate sight distance is available at both site accesses to ensure safe operation of each proposed intersection along SW McEwan Road. No sight distance mitigation is necessary or recommended.
5. Left-turn lane warrants are not projected to be met at either site access intersection under any of the analysis scenarios through the 2019 build-out year. No new turn lanes are necessary or recommended.
6. Due to insufficient main and side-street traffic volumes, traffic signal warrants are not projected to be met at the intersection of SW 65th Avenue at SW McEwan Road under any of the analysis scenarios.
7. Based on a turning-movement analysis, a driveway width of 24 feet is sufficient to accommodate entering emergency response vehicles at the north site access intersection.
8. All study intersections are currently operating acceptably per their respective jurisdictional standards and are projected to continue operating acceptably upon build-out of the proposed development through year 2019. No operational mitigation is necessary or recommended at these intersections.

1e

Project Description and Location

Introduction

The Tualatin Valley Fire & Rescue (TVF&R) Station #39 – Rivergrove, has been proposed for development on a property located near 7100 SW McEwan Road in Tualatin, Oregon. This report addresses the impacts of the proposed development on the nearby street system. The study includes safety and capacity/level-of-service analyses at the following intersections:

- SW 65th Avenue at SW Lower Boones Ferry Road;
- Proposed north site access at SW McEwan Road;
- Proposed south site access at SW McEwan Road; and
- SW 65th Avenue at SW McEwan Road.

The purpose of this study is to determine whether the transportation system within the vicinity of the site is capable of safely and efficiently supporting the existing and proposed uses and to determine any mitigation that may be necessary to do so. Detailed information on traffic counts, trip generation calculations, safety analyses, and level of service calculations is included in the appendix to this report.

Project and Location Description

The project site is located southwest of SW McEwan Road and east of Interstate 5 (I-5) in Tualatin, Oregon. The subject site is surrounded by a mix of land-uses, with a medical clinic to the north, a U-Haul facility to the south, and self-storage facilities to the east. Two notable developments within a half-mile walking/biking distance of the site include the Meridian Square Shopping Mall to the north and River Grove Elementary School to the east.

Access to the site will be provided via two driveways along SW McEwan Road: a two-way access to the north and an emergency response vehicle egress access to the south.

Vicinity Streets

The proposed development is expected to predominantly impact three nearby vicinity roadways: SW Lower Boones Ferry Road, SW McEwan Road, and SW 65th Avenue. Table 1 provides a description of each of the vicinity roadways.

1e

Table 1 – Vicinity Roadway Descriptions

Roadway	Jurisdication	Functional Classification	Cross-Section	Speed	On-street Parking	Bicycle Lanes	Curbs	Sidewalks
SW Lower Boones Ferry Road	Clackamas County	Arterial	5 to 8 Lanes	35 mph Posted	Not Permitted	Both Sides	Both Sides	Both Sides
SW McEwan Road	City of Tualatin	Major Collector/Local Street	2 to 3 Lanes	25/30 mph Posted	Partially Permitted	Partial Both Sides	Partial Both Sides	Partial Both Sides
SW 65th Avenue	City of Tualatin	Neighborhood Collector/Major Collector	2 to 4 Lanes	25/30 mph Posted	Permitted	None	Partial Both Sides	Partial Both Sides

Study Intersections

The intersection of SW 65th Avenue at SW Lower Boones Ferry Road is a four-legged intersection that is controlled by a traffic signal. The northbound approach has one left-turn lane and one shared lane for all turning-movements. The southbound approach has one shared left-turn/through lane and one right-turn lane served with permitted/overlap phasing. The northbound and southbound approaches operate under split phasing. The eastbound approach has one left-turn lane served with protected phasing, two through lanes, one right-turn lane served with permitted/overlap phasing, and a bicycle lane situated in between the outermost through and right-turn lanes. The westbound approach has one left-turn lane served with protected phasing, two through lanes, one shared through/right-turn lane, and a bicycle lane to the right of the outermost standard travel lane. Crosswalks are marked across all four intersection legs.

The intersection of SW 65th Avenue at SW McEwan Road is a four-legged intersection that is all-way stop-controlled. All four intersection approaches each have one shared lane for all turning-movements. Crosswalks are unmarked across all four intersection legs.

A vicinity map displaying the project site, vicinity streets, and the study intersections with their associated lane configurations is shown in Figure 1 on page 5.

Transit

The project site is located near two transit lines that have stops within a half-mile walking/biking distance north of the site, just east of the intersection of SW 65th Avenue at SW Lower Boones Ferry Road. Complete sidewalks and adequate crossing measures at intersections are available between the project site and each of the transit stop locations allowing for safe and comfortable travel for transit users.

1e

TriMet bus line *#36 – South Shore*, provides service between Tualatin Park & Ride and Portland City Center, with notable stops near Lake Oswego Transit Center, Lake Oswego Library, and Johns Landing. Weekday service is scheduled from approximately 7:00 AM to 7:15 PM and has headways of approximately 30 to 100 minutes.

TriMet bus line *#37 – Lake Grove*, provides service between Tualatin Park & Ride and Lake Oswego Transit Center, with notable stops near Lake Oswego High School and Lake Oswego Library. Weekday service is scheduled from approximately 7:00 AM to 5:30 PM and has headways of approximately 50 to 100 minutes.

Traffic Counts

Traffic counts were conducted at the intersection of SW 65th Avenue at SW Lower Boones Ferry Road on Wednesday, November 15th, 2017 and at the intersection of SW 65th Avenue at SW McEwan Road on Tuesday, November 28th, 2017, from 7:00 AM to 9:00 AM and from 4:00 PM to 6:00 PM. Data was used from each intersection's respective morning and evening peak hours.

To determine through volumes along SW McEwan Road at the site access locations, traffic volumes were balanced with the intersections of SW 65th Avenue at SW Lower Boones Ferry Road and at SW 65th Avenue at SW McEwan Road. The highest directional volumes to/from each intersection were utilized, which subsequently provides a conservative assessment of operation at the site access intersections.

Figure 2 on page 6 shows the existing morning and evening peak hour traffic volumes at the study intersections.

Site Trips

Trip Generation

No comparable land-use category exists in the *TRIP GENERATION MANUAL*[1] for fire stations; therefore, the size and operation of the facility was examined in order to best estimate the trip generation of the station. The trip generation calculations shown below are supported by trip data collected at other similar TVF&R stations. The proposed Station #39 is designed for a crew size of six full-time employees. Shifts for full-time employees are 24 hours in duration and shift changes will occur at 7:00 AM. The majority of site trips during the morning peak hour are typically generated from employees. Additional trips corresponding to visitors, deliveries, and emergency response services are also accounted for.

It is estimated that the proposed station will generate a total of twelve morning peak hour site trips, with six employees entering and exiting the site. During the evening peak hour, the site is expected to generate a nominal number individual employee trips to the site; however, two trips entering and exiting the site were included to account for visitors, deliveries, and other miscellaneous traffic. Usage of the TVF&R's Community Room will typically occur after the evening peak hour; therefore, trips generated by the Community Room will increase site's total daily trip generation while not increasing morning or evening peak hour trip generation.

The trip generation estimates of the proposed TVF&R facility are summarized in Table 2 below.

Table 2 – Trip Generation Summary

	Size	Morning Peak Hour			Evening Peak Hour			Weekday Total
		Enter	Exit	Total	Enter	Exit	Total	
Proposed TVF&R #39								
Employee Shift Change	6 Employees	6	6	12	0	0	0	12
Community Room	15 People	0	0	0	0	0	0	20
Emergency Calls	4 Events	0	0	0	0	0	0	8
Non-Emergency Calls	2 Events	0	0	0	0	0	0	4

1e

Trip Distribution

TVF&R Station #39 – Rivergrove will predominately serve residents in the surrounding areas of Tualatin, Lake Oswego, and unincorporated Washington and Clackamas Counties. Areas within the site vicinity, particularly the neighborhoods to the east and northeast of the site, generate a significant number of emergency response calls. Non-emergency trips, such as employee commuting, visitors, deliveries, etc, are more likely to travel to/from SW Lower Boones Ferry Road and I-5.

The directional distribution of peak hour site trips to/from the proposed development was estimated based on locations of likely trip destinations, locations of major transportation facilities within the site vicinity, and existing travel patterns at study intersections.

The following trip distribution was estimated and used for analysis:

- Approximately 60 percent of site trips will travel to/from the west along SW Lower Boones Ferry Road;
- Approximately 15 percent of site trips will travel to/from the east along SW Lower Boones Ferry Road;
- Approximately 10 percent of site trips will travel to/from the east along SW McEwan Road;
- Approximately 10 percent of site trips will travel to/from the south along SW 65th Avenue; and
- Approximately 5 percent of site trips will travel to/from the north along SW 65th Avenue.

The proposed development will be served by two accesses along SW McEwan Road. The north site access will serve inbound emergency response vehicles and as a two-way access for passenger vehicles while the south site access will serve outbound emergency response vehicles only. Based on the projected trips generated, approximately 20 percent of site trips will result from emergency/non-emergency calls to the station; accordingly, the south access may serve approximately 20 percent of exiting trips throughout a typical day. However, since calls to the station are expected to be uncommon, will occur irregularly, and cannot be anticipated, no response calls were projected during either peak hour. Therefore, all site trips generated during the morning and evening peak hours will utilize the northern access.

The trip assignment for the site trips generated by the proposed development during the morning and evening peak hours are shown in Figure 3 on page 9.

Future Traffic Volumes

Background Volumes

To provide analysis of the impact of the proposed development on the nearby transportation facilities, an estimate of future traffic volumes is required. In order to calculate the future traffic volumes at the study intersections, a compounded growth rate of two percent per year for an assumed build-out condition of two years was applied to the measured existing traffic volumes to approximate year 2019 background conditions.

Figure 4 on page 11 shows the projected year 2019 background traffic volumes at the study intersections during the morning and evening peak hours.

Background Volumes plus Site Trips

Peak hour trips calculated to be generated by the proposed development, as described earlier within the *Site Trips* section, were added to the projected year 2019 background traffic volumes to obtain the expected 2019 background volumes plus site trips.

Figure 5 on page 12 shows the projected year 2019 peak hour background traffic volumes plus proposed development site trips at the study intersections during the morning and evening peak hours.

Safety Analysis

Crash Data Analysis

Using data obtained from the Oregon Department of Transportation's (ODOT) Crash Analysis and Reporting Unit, a review of the most recent available five years of crash history (from January 2011 to December 2015) at the study intersections was performed. The crash data was evaluated based on the number of crashes, the type of collisions, the severity of the collisions, and the resulting crash rate for the intersection. Crash rates provide the ability to compare safety risks at different intersections by accounting for both the number of crashes that have occurred during the study period and the number of vehicles that typically travel through the intersection. Crash rates were calculated using the common assumption that traffic counted during the evening peak period represents 10 percent of average daily traffic (ADT) at the intersection. Crash rates in excess of one to two crashes per million entering vehicles (CMEV) may be indicative of design deficiencies and therefore require a need for further investigation and possible mitigation.

The intersection of SW 65th Avenue at SW Lower Boones Ferry Road had ten reported crashes during the analysis period. The crashes consisted of seven rear-end collisions, one angle-type collision, one fixed-object collision, and one turning-movement collision. Of the reported crashes, five were classified as "Property Damage Only" (*PDO*), four were classified as "Possible Injury – Complaint of Pain" (*Injury C*), and one was classified as "Non-Incapacitating Injury" (*Injury B*). The crash rate at the intersection was calculated to be 0.15 CMEV.

The intersection of SW 65th Avenue at SW McEwan Road had one reported crash during the analysis period. The crash was a turning-movement collision that was classified as *PDO*. The crash rate at the intersection was calculated to be 0.11 CMEV.

Based on the most recent five years of available crash data, no significant trends or crash patterns were identified at any of the study intersections. Accordingly, no specific safety mitigation is recommended.

Sight Distance Analysis

Sight distance was examined for the site access intersections located along SW McEwan Road. Intersection sight distance was measured and evaluated in accordance with the standards established in *A Policy on Geometric Design of Highways and Streets*[2]. According to AASHTO, the driver's eye is assumed to be 15 feet from the near edge of the nearest travel lane of the intersecting street and at a height of 3.5 feet above the minor-street approach pavement. The vehicle driver's eye-height along the major-street approach is assumed to be 3.5 feet above the cross-street pavement.

---

[2] American Association of State Highway and Transportation Officials (AASHTO), *A Policy on Geometric Design of Highways and Streets*, 6th Edition, 2011.

1e

North Site Access

The northernmost site access will serve two-way traffic, where vehicles exiting the site will consist of predominately passenger cars. Therefore, the minimum recommended intersection sight distance was calculated assuming a time gap of 7.5 seconds for a minor-street approaching passenger car. Based on a posted speed of 30 mph, the minimum recommended intersection sight distance for a passenger car turning onto a three-lane roadway was calculated to be 335 feet.

Intersection sight distance at the north site access was measured to be 450 feet to the north, limited by a building located north of the site along the eastern side of SW McEwan Road. Sight distance to the south was measured to be in excess of 550 feet. Based on the measurements conducted at the north site access, adequate sight distance is available to ensure safe operation at the proposed intersection while maintaining unimpeded flow of traffic along SW McEwan Road.

South Site Access

The southernmost site access will serve as a one-way egress access for emergency response vehicles only. Typically, it is expected that when an emergency vehicle exits the site, lights and possibly sirens will be active. In these instances, interrupting the flow of traffic on the major-street is the intent of the emergency vehicle and accordingly maintaining adequate intersection sight distance would generally not be applicable at this access. However, in the event that a non-emergency occurs but requires an emergency response vehicle, adequate intersection sight distance would be necessary at the access.

Since the access will serve vehicles larger than a passenger car, the minimum recommended intersection sight distance was calculated assuming a time gap of 9.5 for a minor-street approaching single-unit truck. Based on a posted speed of 30 mph, the minimum recommended intersection sight distance for a single-unit truck was calculated to be 420 feet.

The south egress access will serve emergency response vehicles, which will likely have drivers seated at a higher position than in regular passenger vehicles. Therefore, in addition to utilizing the standard 3.5-foot high driver's eye height on the minor-street approach, a 7.6-foot truck eye height was also used to measure intersection sight distance at the access.

Intersection sight distance at the south site access was measured to be 492 feet to the north, limited by a building located north of the site along the eastern side of SW McEwan Road. Sight distance to the south was measured to be in excess of 550 feet. Based on the measurements conducted at the south site access, adequate sight distance is available to ensure safe operation at the proposed intersection while maintaining unimpeded flow of traffic along SW McEwan Road.

Based on the analysis, adequate sight distance is available at both site accesses to ensure safe operation of each proposed intersection along SW' McEwan Road. No sight distance mitigation is necessary or recommended.

1e

Warrant Analysis

Left-turn and traffic signal warrants were examined for the study intersections where such treatments would be applicable.

A left-turn refuge lane is primarily a safety consideration for the major-street, removing left-turning vehicles from the through traffic stream. The left-turn lane warrants used were developed from the National Cooperative Highway Research Project's (NCHRP) Report 457. Turn lane warrants were evaluated based on the number of advancing and opposing vehicles as well as the number of turning vehicles, the travel speed, and the number of through lanes.

Left-turn lane warrants are not projected to be met at the north site access intersection under any of the analysis scenarios through the 2019 build-out year. Since the south site access will be egress only, left-turn lanes are not applicable at the proposed intersection Accordingly, no new turn lanes are necessary or recommended.

Traffic signal warrants were examined for the unsignalized study intersections to determine whether the installation of any new traffic signal will be warranted at the intersections upon completion of the proposed development. Due to insufficient main and side-street traffic volumes, traffic signal warrants are not projected to be met at the intersection of SW 65th Avenue at SW McEwan Road under any of the analysis scenarios.

Driveway Width

To demonstrate an access width of 24 feet is sufficient to serve emergency response vehicles entering the site at the north access, a turning-movement analysis was conducted using AutoTurn software. A custom design vehicle, modeled after a standard TVF&R emergency response vehicle, was created and used. Analysis scenarios examined include the following:

- A northbound left-turning vehicle entering the north access; and
- A southbound right-turning vehicle entering the north access.

Based on the turning-movement analysis, a driveway width of 24 feet is sufficient to accommodate entering emergency response vehicles at the north site access intersection. Diagrams showing the turning-movements for each analysis scenario are shown in Figure 6 on page 16 and Figure 7 on page 17 for northbound and southbound entering vehicles, respectively.

Operational Analysis

Capacity Analysis

A capacity and delay analysis was conducted for each of the study intersections per the signalized and unsignalized intersection analysis methodologies in the *HIGHWAY CAPACITY MANUAL*[3] (HCM). The level of service (LOS) of an intersection can range from LOS A, which indicates very little or no delay experienced by vehicles, to LOS F, which indicates a high degree of congestion and delay. The volume to capacity (v/c) ratio is a measure that compares the traffic volumes (demand) against the available capacity of an intersection.

The study area includes intersections located within multiple jurisdictions, including the City of Tualatin, and Clackamas County. The following is a description of each jurisdictional standard

- The City of Tualatin standards require intersections operate at LOS E or better.
- Per Table 5-2a and Map 4-8 of Clackamas County's Comprehensive Plan, Clackamas County standards require intersections operate with a v/c ratio of 0.99 or less.

For both LOS and delay related to the analysis of unsignalized intersections, the reported results apply to the worst movement.

The intersection of SW 65th Avenue at SW Lower Boones Ferry Road operates at LOS C with v/c ratios of 0.81 or less during the morning peak hour and at LOS D with v/c ratios of 0.81 or less during the evening peak hour or all analysis scenarios.

Upon build-out of the proposed development, the north site access intersection at SW McEwan Road is projected to operate at LOS C with v/c ratios of 0.02 or less during the morning and evening peak hours.

Upon build-out of the proposed development, the south site access intersection at SW McEwan Road is projected to operate at LOS B with a v/c ratio of 0.01 during the morning peak hour and at LOS C with a v/c ratio of 0.01 during the evening peak hour.

The intersection of SW 65th Avenue at SW McEwan Road currently operates at LOS A during the morning and evening peak hours. Under year 2019 background conditions, the intersection is projected to operate at LOS B during the morning peak hour and at LOS A during the evening peak hour.

The v/c, delay, and LOS results of the capacity analysis are shown in Table 3 for the morning and evening peak hours. The reported results are generally based on the analysis methodologies provided in the 2010 HCM; however, for intersections where the 2010 methodology is unable to determine intersection capacity/delay, such as SW 65th Avenue at SW Lower Boones Ferry Road due to the northbound shared lane

[3] Transportation Research Board, *HIGHWAY CAPACITY MANUAL 2000* and *HIGHWAY CAPACITY MANUAL 2010*.

1e

configuration, operation was evaluated using the HCM 2000 methodologies. Detailed calculations as well as tables showing the relationship between delay and LOS are included in the appendix to this report.

Table 3 – Capacity Analysis Summary

	Morning Peak Hour			Evening Peak Hour		
	LOS	Delay (s)	v/c	LOS	Delay (s)	v/c
SW 65th Ave at SW Lower Boones Ferry Rd						
2017 Existing Conditions	C	31	0.78	D	35	0.78
2019 Background Conditions	C	33	0.81	D	42	0.81
2019 Background plus Site Conditions	C	33	0.81	D	42	0.81
North Site Access at SW McEwan Rd						
2019 Background plus Site Conditions	C	16	0.02	C	18	0.01
South Site Access at SW McEwan Rd						
2019 Background plus Site Conditions	B	15	0.01	C	18	0.01
SW 65th Ave at SW McEwan Rd						
2017 Existing Conditions	A	10	-	A	9	-
2019 Background Conditions	B	10	-	A	9	-
2019 Background plus Site Conditions	B	10	-	A	9	-

Based on the results of the operational analysis, all study intersections are currently operating acceptably per their respective jurisdictional standards and are projected to continue operating acceptably upon build-out of the proposed development through year 2019. No operational mitigation is necessary or recommended at these intersections.

1e

Conclusions

No significant trends or crash patterns were identified at any of the study intersections. Accordingly, no specific safety mitigation is recommended.

Adequate sight distance is available at both site accesses to ensure safe operation of each proposed intersection along SW McEwan Road. No sight distance mitigation is necessary or recommended.

Left-turn lane warrants are not projected to be met at either site access intersection under any of the analysis scenarios through the 2019 build-out year. No new turn lanes are necessary or recommended.

Due to insufficient main and side-street traffic volumes, traffic signal warrants are not projected to be met at the intersection of SW 65th Avenue at SW McEwan Road under any of the analysis scenarios.

Based on a turning-movement analysis, a driveway width of 24 feet is sufficient to accommodate entering emergency response vehicles at the north site access intersection.

All study intersections are currently operating acceptably per their respective jurisdictional standards and are projected to continue operating acceptably upon build-out of the proposed development through year 2019. No operational mitigation is necessary or recommended at these intersections.

Left-Turn Lane Warrant Analysis

1e

Project: TVF&R Station 39
Intersection: North Site Access at SW McEwan Road
Date: 11/28/2017
Scenario: 2019 Background plus Site Conditions - AM Peak Hour

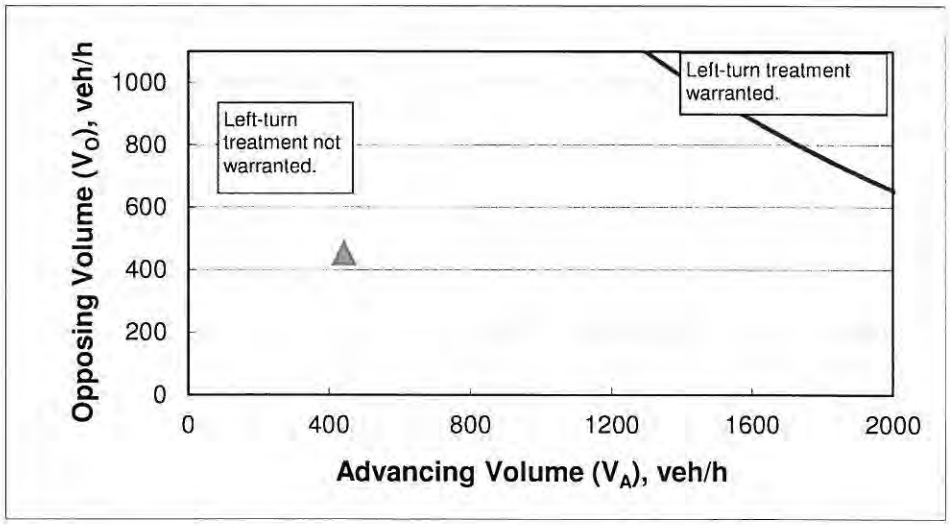
2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	30
Percent of left-turns in advancing volume (V_A), %:	0%
Advancing volume (V_A), veh/h:	443
Opposing volume (V_O), veh/h:	454

OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	2456
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	



CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

Left-Turn Lane Warrant Analysis

Project: TVF&R Station 39
Intersection: North Site Access at SW McEwan Road
Date: 11/28/2017
Scenario: 2019 Background plus Site Conditions - PM Peak Hour

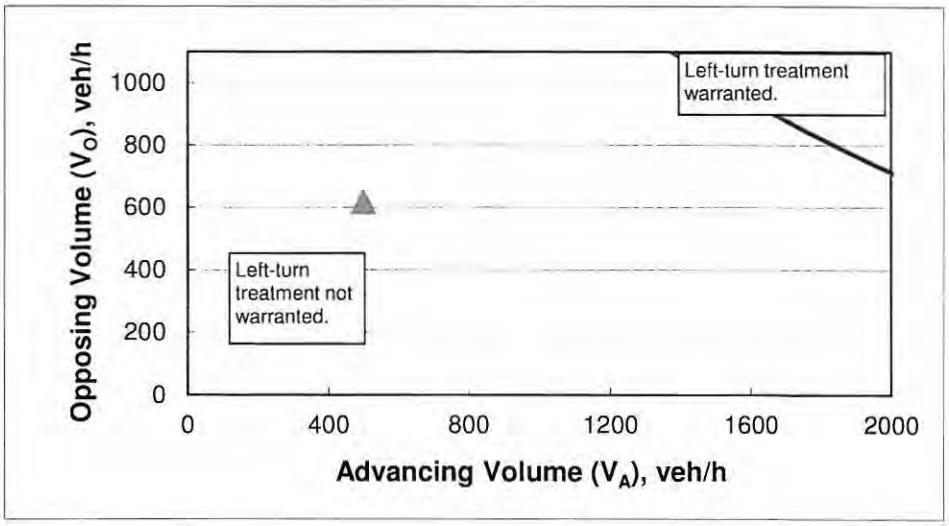
2-lane roadway (English)

INPUT

Variable	Value
85th percentile speed, mph:	30
Percent of left-turns in advancing volume (V_A), %:	0%
Advancing volume (V_A), veh/h:	499
Opposing volume (V_O), veh/h:	620

OUTPUT

Variable	Value
Limiting advancing volume (V_A), veh/h:	2199
Guidance for determining the need for a major-road left-turn bay:	
Left-turn treatment NOT warranted.	



CALIBRATION CONSTANTS

Variable	Value
Average time for making left-turn, s:	3.0
Critical headway, s:	5.0
Average time for left-turn vehicle to clear the advancing lane, s:	1.9

Traffic Signal Warrant Analysis

1e

Project: TVF&R Station 39
Date: 11/30/2017
Scenario: Year 2019 Background plus Site Conditions

Major Street:	SW McEwan Road	Minor Street:	SW 65th Avenue
Number of Lanes:	1	Number of Lanes:	1
PM Peak Hour Volumes:	322	PM Peak Hour Volumes:	90

Warrant Used:

X 100 percent of standard warrants used

_____ 70 percent of standard warrants used due to 85th percentile speed in excess of 40 mph or isolated community with population less than 10,000.

Number of Lanes for Moving Traffic on Each Approach:		ADT on Major St. (total of both approaches)		ADT on Minor St. (higher-volume approach)	
WARRANT 1, CONDITION A		100% Warrants	70% Warrants	100% Warrants	70% Warrants
Major St.	Minor St.				
1	1	8,850	6,200	2,650	1,850
2 or more	1	10,600	7,400	2,650	1,850
2 or more	2 or more	10,600	7,400	3,550	2,500
1	2 or more	8,850	6,200	3,550	2,500
WARRANT 1, CONDITION B					
1	1	13,300	9,300	1,350	950
2 or more	1	15,900	11,100	1,350	950
2 or more	2 or more	15,900	11,100	1,750	1,250
1	2 or more	13,300	9,300	1,750	1,250

Note: ADT volumes assume 8th highest hour is 5.6% of the daily volume

	Approach Volumes	Minimum Volumes	Is Signal Warrant Met?
Warrant 1			
Condition A: Minimum Vehicular Volume			
Major Street	3,220	8,850	
Minor Street*	900	2,650	**No**
Condition B: Interruption of Continuous Traffic			
Major Street	3,220	13,300	
Minor Street*	900	1,350	**No**
Combination Warrant			
Major Street	3,220	10,640	
Minor Street*	900	2,120	**No**

* Minor street right-turning traffic volumes reduced by 25%

1e

LEVEL OF SERVICE

Level of service is used to describe the quality of traffic flow. Levels of service A to C are considered good, and rural roads are usually designed for level of service C. Urban streets and signalized intersections are typically designed for level of service D. Level of service E is considered to be the limit of acceptable delay. For unsignalized intersections, level of service E is generally considered acceptable. Here is a more complete description of levels of service:

Level of service A: Very low delay at intersections, with all traffic signal cycles clearing and no vehicles waiting through more than one signal cycle. On highways, low volume and high speeds, with speeds not restricted by other vehicles.

Level of service B: Operating speeds beginning to be affected by other traffic; short traffic delays at intersections. Higher average intersection delay than for level of service A resulting from more vehicles stopping.

Level of service C: Operating speeds and maneuverability closely controlled by other traffic; higher delays at intersections than for level of service B due to a significant number of vehicles stopping. Not all signal cycles clear the waiting vehicles. This is the recommended design standard for rural highways.

Level of service D: Tolerable operating speeds; long traffic delays occur at intersections. The influence of congestion is noticeable. At traffic signals many vehicles stop, and the proportion of vehicles not stopping declines. The number of signal cycle failures, for which vehicles must wait through more than one signal cycle, are noticeable. This is typically the design level for urban signalized intersections.

Level of service E: Restricted speeds, very long traffic delays at traffic signals, and traffic volumes near capacity. Flow is unstable so that any interruption, no matter how minor, will cause queues to form and service to deteriorate to level of service F. Traffic signal cycle failures are frequent occurrences. For unsignalized intersections, level of service E or better is generally considered acceptable.

Level of service F: Extreme delays, resulting in long queues which may interfere with other traffic movements. There may be stoppages of long duration, and speeds may drop to zero. There may be frequent signal cycle failures. Level of service F will typically result when vehicle arrival rates are greater than capacity. It is considered unacceptable by most drivers.

1e

LEVEL OF SERVICE CRITERIA
FOR SIGNALIZED INTERSECTIONS

LEVEL OF SERVICE	CONTROL DELAY PER VEHICLE (Seconds)
A	<10
B	10-20
C	20-35
D	35-55
E	55-80
F	>80

LEVEL OF SERVICE CRITERIA
FOR UNSIGNALIZED INTERSECTIONS

LEVEL OF SERVICE	CONTROL DELAY PER VEHICLE (Seconds)
A	<10
B	10-15
C	15-25
D	25-35
E	35-50
F	>50

Subject: TVF&R Station 39 – Transportation Impact Study Addendum #1

Introduction

At your request, this memorandum is written to provide a comparison of the proposed Tualatin Valley Fire and Rescue Station #39 with a reasonable worst-case development that could be constructed on the site under the existing industrial zone. The fire station is allowed as a conditional use in the existing zone and an examination of how the fire station affects conditions at the planning horizon is also included.

Trip Generation Comparison

As shown in the Transportation Impact Study[1], the fire station is expected to generate a total of 12 trips during the morning peak hour, 4 trips during the evening peak hour, and a weekday total of 54 trips.

To estimate potential trip generation of the building if it were to be re-occupied by an industrial user that is allowed in the current zone, trip rates from the *Trip Generation Manual* [2] were used. The trip rates are from land-use category 110, General Light Industrial and are based on the building square footage. The results of the trip generation calculations show that an industrial use of the fire station building would generate 9 trips during the morning peak hour, 9 trips during the evening peak hour, and a total of 66 weekday trips. The table below shows a summary of the trip generation comparison.

Table 1: Trip Generation Comparison

Land Use	Size	AM Peak Hour	PM Peak Hour	Weekday
Proposed Fire Station	9,500 sf	12	4	54
General Light Industrial	9,500 sf	9	9	66
Net Increase in Trips		3	-5	-12

[1] Tualatin Valley Fire & Rescue Station #39 Rivergrove, Transportation Impact Study, Table 2 on page 7
[2] Institute of Transportation Engineers (ITE), Trip Generation Manual, 9th Edition, 2012.

Planning Horizon Conditions

As shown in Table 1, the proposed fire station represents a reduction in trip generation during the evening peak hour and over a typical weekday and only a minor increase during the morning peak hour. The two uses are very similar in trip generation and the proposed conditional use for the fire station does not increase the trip generation of the site above what would be allowed outright in the zone.

As such, development of this intensity is already considered in the City of Tualatin's Comprehensive Plan, including the Transportation System Plan (TSP) and its planning-horizon analyses. There will be no long-term traffic impacts to surrounding streets and intersections above what is already considered in the TSP as a result of the proposed fire station.

TABLE OF CONTENTS
Development Application for TVF&R Station 39

List of Figures

List of Exhibits

Section 1: Project Information

General Description

Tualatin Valley Fire & Rescue (TVF&R) is seeking Conditional Use approval from the City of Tualatin to construct a new fire station (Station 39) on tax lot 1601, located on SW McEwan Road, south of SW Boones Ferry Road (see Figure 2).

Site and Context

The site is a new tax lot approximately 1.16 acres in size (see Exhibit 5).[1] The site for Station 39 is zoned Light Industrial (ML), as shown in Figure 2. The site has frontage on SW McEwan and is surrounded on three sides by U-Haul, a storage facility permitted in the ML zone. Additional storage facilities are located across SW McEwan from the subject site. Other prominent features around the site include Interstate 5 to the west with commercial shopping area beyond that; and the P&W rail line to the south and east with additional light manufacturing and residential areas zoned for medium-high density dwellings.

Technical Details

The proposed building will be a single-story, hip roofed fire station approximately 9,500 square feet and will include a 600-square foot community room (see Exhibit 2 for preliminary site plan drawings and building elevations). The building will house the station's firefighters and have an interior two-space parking bay for fire trucks and necessary emergency apparatus. There are 12 staff and 21 public (33 total) parking spaces proposed on-site to serve the fire station and community room. Station 39 will include 24-hour staffing starting with four persons per shift and ultimately grow to six-person shifts.[2]

The building will look similar to TVF&R Station 55 which is currently under construction in the City of West Linn. The primary exterior building materials will consist of brick masonry veneer, metal wall panels, and precast concrete. Other materials include metal clad wood windows, steel apparatus bay doors, standing seam metal roofing, and hollow metal and aluminum entrance doors.

Neighborhood and Community Outreach

A formal Neighborhood/Developer Meeting was held on November 7, 2017. The meeting was held at Juanita Pohl Center at 8513 SW Tualatin Road. TVF&R representatives reviewed the proposed project, the need for the new station, and described the architectural features. The audience asked a number of questions. Additional information on the Neighborhood/Developer Meeting, including the list of recipients for the mailed notice, and presentation materials, can be found in Exhibit 6.

Project Schedule

Following approval of the Conditional Use for Station 39, TVF&R will submit an Architectural Review 2 application for the building to the City of Tualatin. Assuming Architectural Review approval in early summer, construction of Station 39 could begin in the fall of 2018 with occupancy and operation by the end of 2019.

---

[1] See Exhibits 7 and 8. On May 4, 2017, the Washington County Circuit Court granted plaintiffs (TVF&R) Motion for Entry of an Order of Immediate Possession. Accordingly, as of May 5, 2014, TVFR has immediate legal possession of the property, and as such may proceed with moving forward with its project.

[2] The maximum occupancy (six staff) is used in the transportation impact study as evaluated in Exhibit 3

Section 2: Tualatin Development Code

Light Manufacturing Planning District (ML) (TDC Chapter 60)

Station 39 is located in the ML zoning district. As noted in TDC Section 60.040(1)(f), a Fire Station is permitted in the ML zone as a Conditional Use.

Conditional Use Approval Criteria (TDC 32.030)

Pursuant to Section 32.030, Tualatin City Council may allow a conditional use, after conducting a public hearing, provided that the applicant, TVF&R demonstrates a fire station satisfies the following criteria.

(1) The use is listed as a conditional use in the underlying planning district.

Response: Station 39 is located in the ML zoning district. As noted in TDC Section 60.040(1)(f), a Fire Station is permitted in the ML zone as a Conditional Use.

(2) The characteristics of the site are suitable for the proposed use, considering size, shape, location, topography, existence of improvements and natural features.

Response: The site characteristics are compatible with other TVF&R stations throughout the District. The site size (1.16 acres) is consistent with comparable TVF&R stations and can accommodate the building program for Station 39. There are no topographic or natural features on the site that will impact construction of Station 39. TVF&R has identified the location as an appropriate location to meet required service response standards and needs of the District. It's location near Interstate 5 will provide quick response to incidents on the freeway as well as quick emergency response to the surrounding community. TVF&R's Station 34 is located in the City of Tualatin but is on the westside of Interstate 5 just off Tualatin Sherwood Road (19365 SW 90th Court). Station 39's location on the eastside of Interstate 5 will significantly enhance response times for emergency services, making this location very suitable for the proposed use.

(3) The proposed development is timely, considering the adequacy of transportation systems, public facilities, and services existing or planned for the area affected by the use.

Response: The construction of the proposed Station 39 is funded through General Fund and a Local Option Levy approved by District voters in 2014 to upgrade and improve the safety and operations of TVF&R's fire stations. TVF&R identified the need for a station in this location to ensure quick response times in the future as development continues in Tualatin, Lake Oswego, and Tigard. Public services are immediately available to the site. As noted in the Traffic Impact Analysis submitted with this application (Exhibit 3), Station 39 traffic will not adversely impact the existing transportation system. The analysis notes that Station 39 will generate a small number of daily trips that can easily be accommodated on the transportation system.

(4) The proposed use will not alter the character of the surrounding area in any manner that substantially limits, impairs, or precludes the use of surrounding properties for the primary uses listed in the underlying planning district.

Response: The location of Station 39 will allow uses on the property immediately adjacent to Station 39 to continue operating and will not limit or preclude the use of surrounding property. As can be seen on the attached Station 39 site plan (Exhibit 2), TVF&R will take direct access to SW McEwan Road and will not impede or conflict with access to surrounding properties. The Traffic Impact Analysis submitted with this application indicates that Station 39 traffic will not adversely impact the existing transportation system. The analysis notes that Station 39 will generate a small number of daily trips that can easily be accommodated on the transportation system.

The site plan also notes how stormwater will be accommodated on-site and in a manner that will not impact adjacent properties. As well landscaping provided with the project will create a visual buffer between Station 39 and adjacent properties.

The emergency services use is not out of character with surrounding land uses in the ML zone. Medical offices are located across SW McEwan from Station 39. As can be seen from the building elevations submitted with this application Station 39 will be an appropriate design and will not be out of character with existing industrial and office buildings on surrounding properties.

(5) The proposal satisfies those objectives and policies of the Tualatin Community Plan that are applicable to the proposed use.

Response: The Tualatin Community Plan, which is the City comprehensive plan, is integrated within the Tualatin Development Code (TDC) as Chapters 1-30. Based on discussions with City of Tualatin staff, the following two sections of the TDC are applicable to the proposed use:

A. Section 7.040 Manufacturing Planning District Objectives.

This section describes the purpose of each manufacturing planning district.

(2) Light Manufacturing Planning District (ML)

(a) Suitable for warehousing, wholesaling and light manufacturing processes that are not hazardous and that do not create undue amounts of noise, dust, odor, vibration, or smoke. Also suitable, with appropriate restrictions, are the retail sale of products not allowed for sale in General Commercial areas, subject to the Special Commercial Setback from arterial streets and Commercial Services Overlay as generally illustrated in Map 9-5 and specifically set forth in TDC 60.035, and office commercial uses where any portion of a legally created lot is within 60 feet of a CO Planning District boundary. Also suitable is the retail sale of products manufactured, assembled, packaged or wholesaled on the site provided the retail sale area, including the showroom area, is no more than 5% of the gross floor area of the building not to exceed 1,500 square feet. Also suitable for the retail sale of home improvement materials and supplies provided it is not greater than 60,000 square feet of gross floor area per building or business and subject to the Special Commercial Setback from arterial streets as generally illustrated in Map 9-5 and specifically set forth in TDC 60.035. Rail access and screened open storage allowed in these areas will conform to defined architectural, landscape and environmental design standards.

B. Chapter 60: Light Manufacturing Planning District (ML)

Section 60.010 Purpose.

The purpose of this district is to provide areas of the City that are suitable for industrial uses and compatible with adjacent commercial and residential uses. The district serves to buffer heavy manufacturing uses from commercial and residential areas. The district is suitable for warehousing, wholesaling, and light manufacturing processes that are not hazardous and do not create undue amounts of noise, dust, odor, vibration, or smoke. The district is also suitable for retail sale of products manufactured, assembled, packaged or wholesaled on the site provided the retail sale area, including the showroom area, is no more than 5% of the gross floor area of the building not to exceed 1,500 square feet and, with appropriate restrictions, for retail sale of products not allowed for sale in General Commercial Planning Districts, and office commercial uses where any portion of a legally created lot is within 60 feet of a CO Planning District boundary. Railroad access and screened outdoor storage will be allowed in this district, conforming to defined architectural, landscape, and environmental design standards. In accordance with the Industrial Business Park Overlay District, TDC Chapter 69, and TDC 60.037-60.038 selected small-scale mixed uses that are supportive of and secondary to industrial uses are allowed to provide services to businesses and employees. The purpose is also to allow certain commercial service uses in the Commercial Services Overlay shown in the specific areas illustrated on Map 9-5 and selected commercial uses subject to distance restrictions from residential areas and subject to the Special Commercial Setback from arterial streets as generally illustrated in Map 9-5 and specifically set forth in TDC 60.035.

Locating TVF&R Station 39 in the ML district is appropriate. As noted in TDC Section 60.040(1)(f), a Fire Station is permitted in the ML zone as a Conditional Use. The use is not hazardous and will not create undue amounts of noise, dust, odor, vibration, or smoke. Any noise generated will be limited. Station 39 will not require sirens to sound at or near the site. Fire personnel are not required to sound sirens when leaving the station, the lights on the apparatus normally are sufficient to stop traffic. The only time the fire apparatus operators would be required to use their sirens would be when they pass through a traffic signal. Regardless, there are no noise sensitive uses near the site.

The City's comprehensive plan is designed to promote public health, safety, and welfare. Providing opportunities for emergency services to operate within the City is a critical aspect of community health, safety, and welfare. As noted earlier, locating Station 39 at this site will allow TVF&R to achieve their emergency services response times. As well, the Traffic Impact Analysis submitted with this application indicates that Station 39 traffic will not adversely impact the existing transportation system. The analysis notes that Station 39 will generate a small number of daily trips that can easily be accommodated on the transportation system.

Summary

This proposal for Conditional Use approval for Station 39 satisfies the objectives and policies of the Tualatin Community Plan that are applicable to the proposed use. Therefore, the Conditional Use should be approved.

MEMORANDUM

TVF&R Station 39

Pre-Application Conference Request

DATE	September 11, 2017
TO	City of Tualatin
FROM	Frank Angelo, APG
CC	Siobhan Kirk, TVF&R Jennifer Jenkins, Ankrom Mosian Architects Michael Bonn, Ankrom Moisan Architects Bruce Baldwin, AKS Todd Mobley, Lancaster Engineering Jamin Kimmel, APG

Tualatin Valley Fire & Rescue is proposing to develop a new fire station (Station 39) on SW McEwan Road south of SW Boones Ferry Road. The new station will be approximately 9,500 square feet and will include a 600-square foot community room. The building will house the station's firefighters and have an interior two-space parking bay for fire trucks and necessary emergency apparatus. There are 36 parking spaces proposed on-site to serve the fire station and community room. Station 39 will include 24-hour staffing starting with 4 persons per shift and ultimately growing to 6 person shifts. The building will look similar to TVF&R Station 55 which is currently under construction in the City of West Linn.

<u>Questions for the Pre-Application Conference</u>

1. Describe the Conditional Use and Architectural review standards, review procedures and schedule.
2. Discuss Neighborhood Meeting requirements.
3. Identify Transportation Assessments that will be required (if any).
4. Describe CWS review requirements.

City of Tualatin

COMMUNITY DEVELOPMENT PLANNING DIVISION

Pre-Application Meeting Request

The purpose of the Scoping and Pre-Application meetings is to offer early assistance in the land use and permitting process. This includes thoughtful feedback on preliminary design direction and visioning, outlining expectations, and to assist the applicant in attaining a complete application at first submittal.

PROJECT DESCRIPTION

Project name/title: TVF&R Station 39

What is the primary purpose of this pre-application meeting (What would you like to accomplish)? (Attach additional sheets if needed.)

- Review Station 39 site plan
- Discuss site issues
- Determine review processes & standards

PROPERTY INFORMATION

Property address/location(s): Adjacent to 7100 SW McEwan, Tualatin, OR 97062

Tax map and tax lot no.(s): 2S 113DD TL 1600/1700

Zoning: ML

PROPERTY OWNER/HOLDER INFORMATION

Name(s): Tualatin Valley Fire & Rescue c/o Siobhan Kirk

Address: 11945 SW 70th Ave Phone: 503.649.8577

City/state: Tigard, OR Zip: 97223

APPLICANT INFORMATION

Name: Angelo Planning Group

Address: 921 SW Washington St Phone: 503.649.8577

City/state: Portland, OR Zip: 97205

Contact person: Frank Angelo

Phone: 503.227.3664 Email: fangelo@angeloplanning.com

Pre-application Conference Information

All of the information identified on this form is required and must be submitted to the Planning Division with this application. Conferences are scheduled subject to availability and a minimum of two weeks after receiving this application and all materials. Pre-application conferences are one (1) hour long and are typically held on Mondays between the hours of 3-4 p.m. or Wednesdays between 2-4 p.m.

REQUIRED SUBMITTAL ELEMENTS

(Note: Requests will not be accepted without the required submittal elements)

☐ A complete application form and accompanying fee.

1 hard copy and an electronic set of the following:

☐ Preliminary site and building plans, drawn to scale, showing existing and proposed features. (Plans do not need to be professionaly prepared; just accurate and reliable.)

☐ A detailed narrative description of the proposal that clearly identifies the location, existing and proposed uses, and any proposed construction.

☐ A list of all questions or issues the applicant would like the City to address.

FOR STAFF USE ONLY

Case No.: _____

Application accepted:

By: _____ Date: _____

Date of pre-app: _____

Time of pre-app: _____

Planner assigned to pre-app: _____

If more than four (4) people are expected to attend the pre-application conference in your group, please inform the City in advance so that alternate room arrangements can be made to accommodate the group.

What type of development are you proposing? (Check all that apply)

[ ] Industrial [ ] Commercial [ ] Residential [X] Institutional [ ] Mixed-use

Please provide a brief description of your project: (Attach additional sheets if needed.) Please include description of existing uses and structures in addition to what is proposed.

Construct a new TVF&R fire station (Station 39). Will include a community room.

Are you familiar with the development process in Washington or Clackamas County or Tualatin?

[X] Yes [ ] No

If yes, please identify an example project:

TVF&R Station 34 in Tualatin

Are you familiar with the sections of the Tualatin Development Code (TDC) that pertain to your proposed development?

[X] Yes [ ] No

Is the property under enforcement action? If yes, please attached a notice of the violation.

Please provide the names of City, TVF&R, CWS, and County staff with whom you have already discussed this proposal:

RE: TVF+R Station 39

LAND USE PLANNING
TRANSPORTATION PLANNING
PROJECT MANAGEMENT

Dear Resident/Property Owner,

Tualatin Valley Fire & Rescue (TVF&R) is proposing to develop a new fire station (Station 39) on SW McEwan Road south of SW Boones Ferry Road. The new station will be approximately 7,500 square feet and include a 600-square foot community room. The building will house the station's firefighters and have an interior two-space parking bay for fire trucks and necessary emergency apparatus. Station 39 will include 24-hour staffing starting with 4 persons per shift and ultimately growing to 6-person shifts.

The 1.16-acre site is within the City of Tualatin's Light Manufacturing Planning District (ML). New fire stations are permitted in the ML Planning District through a Conditional Use Permit and Architectural Review. The Conditional Use will require submittal of an application to the City for review and approval by the City Council. A pre-application conference was held for the project on September 20, 2017. Following Conditional Use review an Architectural Review application will be submitted for construction of the new station. This application will be reviewed by staff.

As specific engineering and site plans are being prepared and before submitting the application for the necessary reviews and approvals, we would like to discuss the proposal with the surrounding property owners and residents. In accordance with City requirements, we are conducting a Neighborhood Meeting on the following date and at the following location:

Tuesday, November 7th, 2017
6:00 – 7:00 pm
Juanita Pohl Center
8513 SW Tualatin Road
Tualatin, Oregon 97062

We look forward to discussing the proposal with you. Please feel free to contact the project's development application representative, at 503-227-3664 or fangelo@angeloplanning.com if you have any questions.

Sincerely,

Frank Angelo, Principal

NEIGHBORHOOD / DEVELOPER MEETING
CERTIFICATION OF SIGN POSTING

In addition to the requirements of TDC 31.064(2) quoted earlier in the packet, the 18" x 24" sign that the applicant provides must display the meeting date, time, and address and a contact phone number. The block around the word "NOTICE" must remain **orange** composed of the **RGB color values Red 254, Green 127, and Blue 0**. Additionally, the potential applicant must provide a flier (or flyer) box on or near the sign and fill the box with brochures reiterating the meeting info and summarizing info about the potential project, including mention of anticipated land use application(s). Staff has a Microsoft PowerPoint 2007 template of this sign design available through the Planning Division homepage at < www.tualatinoregon.gov/planning/land-use-application-sign-templates >.

As the applicant for the

TVF&R Station 39 project, I

hereby certify that on this day, October 24, 2017 sign(s) was/were posted on the subject property in accordance with the requirements of the Tualatin Development Code and the Community Development Department - Planning Division.

Applicant's Name: Clinton Doxsee, Angelo Planning Group

MEMORANDUM

TVF&R Station 39

Neighborhood Meeting Notes

DATE November 9, 2017
TO Project Team
FROM Frank Angelo, APG
CC

The Station 39 Neighborhood Meeting for the land use application was held on Tuesday, November 7, 2017 at the Juanita Pohl Center, 8513 SW Tualatin Road, Tualatin, Oregon 97062. The meeting Agenda, Sign-in Sheet and Illustrations presented at the meeting are attached to this meeting summary.

Project team attendance:

- TVF&R: Assistant Chief Havener, Siobhan Kirk
- APG: Frank Angelo
- Ankrom Moisan Architects: Michael Bonn
- AKS: Bruce Baldwin
- Lancaster Engineering: Todd Mobley

City of Tualatin Staff in attendance:

- Charles Benson, Planner

Frank Angelo introduced the Neighborhood Meeting and turned it over to Assistant Chief Havener to introduce the project and discuss the site selection, project funding and station operations.

Frank Angelo reviewed the land use application process and schedule for application submittal, noting the following.

- Tonight's meeting is a part of the city's land use application process. We are preparing a Conditional Use first, then an Architectural Review 2 land use application to demonstrate how the project complies with the City's CU Review Criteria.
- The Conditional Use application will address the use of the property and be presented at a City Council public hearing.

- The second application will follow Conditional Use approval and will be the Architectural Review application.
- The AR application will demonstrate how the project meets the City's design requirements and standards.
- The AR application will be reviewed and approved by staff. The application does not require review/approval by the Planning Commission.
- We expect to file the Conditional Use application in November.
- You received direct notice of tonight's meeting because you are within 1000' of the project site. Following submittal of the CU application you will receive notice of the Planning Commission hearing date/time.

Michael Bonn, Ankrom Moisan Architects, reviewed the site plan and building design elements.

- Michael provided an overview of site design considerations and key features.
- Stepped through the site plan, access to the site, on-site circulation, stormwater treatment, and landscaping.
- Station 39 will be similar in design to Station 55 currently under construction in West Linn.
- Staffing will be 4 full-time staff (24-hour shifts) with room to expand to 6 full-time staff.
- Michael noted the 600 sf Community Room and its availability to the residents for meetings.

Questions from the audience:

1. Discuss the landscaping that will be provided.
2. Question regarding the location of the driveway to SW McEwen and its proximity to the existing cell tower.
3. Where is the station in relation to the Legacy Medical office?
4. Has the design considered flooding and debris flows from Scoggins Dam?
5. Where is this site in relation to the Lake Oswego Fire District boundary?
6. Is there an agreement (Mutual Aid Agreement) between TVF&R and LOFD?
7. Is the building being constructed to address emergency preparedness? Design will include seismic enhancements.
8. Will TVF&R assist with HazMat calls?

The meeting adjourned at 7:00pm.

Re: Tualatin Valley Fire & Rescue

Dear Sean:

I have been hired by Tualatin Valley Fire & Rescue ("TVFR") to work with TVFR's general counsel, Bob Blackmore, on the acquisition of property necessary for TVFR to build a new fire station for the health, safety and welfare of its fire district. One of the issues that came up recently with your planning department was the legal ability of TVFR to proceed with the land use process necessary to build the facility because TVFR does not have title to the property.

Prior to joining this law firm, I was a Senior Assistant Attorney General at the Oregon Department of Justice in the trial division, where I specialized in condemnation. Since returning to private practice, I have represented several government entities in the acquisitions of properties for public use. Most recently, I was the condemnation attorney for the City of Lake Oswego-Tigard Water Partnership. I worked closely with City Attorney David Powell on all of the necessary property acquisitions for that project.

The Oregon Condemnation Procedures Act ORS Chapter 35 governs and describes the condemnation powers a government entity has and the procedures it must follow. When a public condemnor commences an action for condemnation of property, and immediate possession of the property is considered necessary by the public condemnor, the condemnor may deposit funds into the court where the action was commenced for the use of the defendants in the action. ORS 35.265. TVFR filed a complaint in Washington County Circuit Court on April 6, 2017 against Amerco Real Estate Company ("U-Haul") and deposited funds into court in compliance with the statute. Thereafter, on April 18, 2017, TVFR filed a Notice of Immediate Possession of Property with the court. Any time after a condemnation action is commenced, the public condemnor may serve notice on the property owner that it will take immediate possession of the property that is the subject of the condemnation action.

ORS 35.352. On May 4, 2017, the Washington County Circuit Court granted plaintiff's Motion for Entry of an Order of Immediate Possession.

Accordingly, as of May 5, 2014, TVFR has immediate legal possession of the property, and as such may proceed with moving forward with its project.[1] Even if there is an appeal to the action from the judgment, the appeal will not stay the proceeding as to prevent the condemnor from taking possession of the property and using it for the purposes for which it is being appropriated. ORS 35.355. Thus, the legislature intended that the condemnor – TVFR – could proceed with the project while the property owner has the right to contest the amount of just compensation. TVFR has the necessary legal authority to proceed as if it had legal title to the property. The condemnation proceeding is scheduled for a jury trial March 5, 2018 to March 9, 2018.

Feel free to contact either Bob Blackmore at (503) 479-7175 or myself if you have any questions. I understand that a meeting to discuss next steps is being set up and we thought setting out the legal status of TVFR in advance would assist you.

Very truly yours,

GARVEY SCHUBERT BARER

By
Cynthia M. Fraser

GSB:9003400.1 [37746.00100]

[1] It should also be noted that there is a statutory presumption of necessity that when TVFR declared the taking of the U-Haul property necessary for its purposes of the health and safety of its district, there is a presumption of evidence of the necessity of the property. See *Port of Umatilla v. Richmond*, 212 Or 596 321 P2d 338 (1958). In the absence of fraud, bad faith or abuse of discretion, the necessity propriety or expediency of appropriation of the property for the public use, the location of the property taken and it suitableness for the proposed use are legislative questions and therefore not subject to review by the court.

SPECIAL REPORTS
Annual Report for the Tualatin Library Advisory Committee

TLAC 2017 Annual Report
TLAC 2017 Presentation

2017 ANNUAL REPORT

Tualatin Library Advisory Committee

1. BACKGROUND

The Tualatin Library Advisory Committee (TLAC) was established by Ordinance 758-88, adopted by Council on October 10, 1988, and incorporated into the Tualatin Municipal Code as Chapter 11-4. The enabling ordinance requires the TLAC to file an annual report with the Council including a summary of the committee's activities during the preceding year and other matters and recommendations the committee deems appropriate.

Members of the TLAC during 2017 include Sonya Ambuehl, Alan Feinstein, Nicholas Schiller (Vice Chair), Thea Wood (Chair), and Marcus Young. Former members included teen representative Mohammed Dezay and Don Swygard, who resigned in September 2017. Laura Stewart and Hannah Watt (teen representative) joined the committee in January 2018.

2. ROLES OF THE COMMITTEE

A. Consult with and advise the Library Manager on all matters affecting operational policies of the City Library.

B. Make recommendations to the City Council with respect to services, facilities and all other matters pertaining to the maintenance and improvement of the City Library.

C. Hear and consider complaints about City Library policies or materials.

3. ACTIONS AND ACCOMPLISHMENTS IN SUPPORT OF ROLES IN 2017

A. CONSULT WITH AND ADVISE THE LIBRARY MANAGER ON ALL MATTERS AFFECTING OPERATIONAL POLICIES OF THE CITY LIBRARY

1. TLAC reviewed best practices for library policies. Committee members considered & provided recommendations on several operational policies, including Distribution of Free Materials, Self-Reported Theft, Programming, Photo/Video, and Non-Library Activities on the Library Plaza.

2. TLAC discussed and provided comments to Library management regarding overdue fines, Summer Reading, Teen Room Code of Conduct, Library budget, parking, early literacy services, Library serving as a cooling center, and library utilization trends. Committee members shared their perspective as citizens and library users, providing input representing our diverse community.

B. MAKE RECOMMENDATIONS TO THE CITY COUNCIL WITH RESPECT TO SERVICES, FACILITIES, AND ALL OTHER MATTERS PERTAINING TO THE MAINTENANCE AND IMPROVEMENT OF THE CITY LIBRARY.

1. TLAC members discussed a progress report for the Library's strategic plan actions completed in 2017 and updated strategies for 2018. Highlighted accomplishments included:
    a. 97% of surveyed parents said storytime helped them feel more confident about helping their child learn and 98% learned something they could share with their child.
    b. 1000 Books Before Kindergarten, an early literacy program, was launched.
    c. Mobile Makerspace was successfully launched and transitioned to ongoing library program.
    d. Opportunities for youth volunteers were increased.
    e. Three additional bilingual staff hired.

    Committee members discussed and made suggestions to support programs and services that align with the following City Council 2030 Vision initiatives: a connected, informed, and engaged community; a diverse and inclusive community where everyone has equal access to opportunities in order to thrive and enjoy a high quality of life; and an affordable, livable, family-oriented, healthy, active, and safe community for all incomes, ages, and abilities.

2. TLAC received regular information regarding the Parks & Recreation Master Plan update and provided input and recommendations to the plan's Project Advisory Committee during the public outreach phase.

3. The committee also provided comments and advice regarding the America's Best Communities initiative and Tualatin's Americans with Disabilities Act Transition Plan.

4. TLAC received presentations from a number of library partners and recommended activities to strengthen these partnerships. Presentations included:
    a. Teen Library Committee
    b. Community Services
    c. Tualatin Library Foundation
    d. Friends of Tualatin Library
    e. Tualatin's America's Best Communities project team

C. HEAR AND CONSIDER COMPLAINTS ABOUT CITY LIBRARY POLICIES OR MATERIALS.

1. TLAC holds open meetings and members of the public are invited to attend. No formal complaints were brought before the committee in 2017.

2. TLAC members review comment cards received by the City regarding the Library each month and provide input on the topics raised.

4. **ACTION PLAN FOR 2018**

A. LONG-RANGE PLANNING
TLAC will continue to be actively involved and provide citizen feedback for the City's Parks and Recreation Master Plan update and review Library services in light of priorities identified in the Library strategic plan.

B. REVIEW OPERATIONAL POLICIES
TLAC will continue to be actively involved and educated in the operations and roles of the Library. TLAC will provide citizen feedback as Library management reviews and updates operational policies, including an update to the Library Rules of Conduct.

C. ADVANCE COUNCIL VISION
TLAC will support social equity and inclusion within Library programs and services, providing opportunity to thrive for all community members.

Committee Role

The role of TLAC is to:

- Consult with Library Manager on all matters affecting Library operational policy.

- Make recommendations to City Council regarding Library services, facilities, and improvements.

- Hear and consider complaints about Library policies or materials.

Consult with Library Manager on all matters affecting Library operational policy

- Reviewed best practices for library policies
- Provided recommendations on policies: Distribution of Free Materials, Self-Reported Theft, Non-Library Activities on Library Plaza
- Provided comments & recommendations: overdue fines, Teen Room Code of Conduct, early literacy services, cooling center

Recommendations regarding Library services, facilities, and improvements

- Community members experience library as welcoming place that inspires, delights, & satisfies curiosity.
- Community members gather, connect, engage, and are empowered through library.
- Young children are prepared for success in school.
- Latino residents discover library as gateway to community connection.
- Youth have hands-on access to technology and science learning tools.

Recommendations regarding Library services, facilities, and improvements

Highlighted Accomplishments:

- 97% surveyed storytime parents felt more confident helping their child learn
- 1000 Books Before Kindergarten launched
- Mobile Makerspace transitioned to ongoing Library program
- Opportunities for youth volunteers increased
- 3 bilingual staff hired

Recommendations regarding Library services, facilities, and improvements

- Parks & Recreation Master Plan Update
- Americans with Disabilities Act Transition Plan
- Tualatin Mobile Makerspace (America's Best Communities competition)

Hear and consider complaints about Library policies or materials

- Review comment cards, provide feedback

Action Plan for 2018

- Provide input for the Parks and Recreation Master Plan update
- Review Library services prioritized in strategic plan
- Continue review of Library operational policies, including Library Rules of Conduct
- Support social equity & inclusion within Library programs and services

Tualatin Library Advisory Committee (TLAC)

Questions?

STAFF REPORT
CITY OF TUALATIN

TO: Honorable Mayor and Members of the City Council

THROUGH: Sherilyn Lombos, City Manager

FROM: Erin Engman, Associate Planner
Aquilla Hurd-Ravich, Community Development Director

DATE: 04/23/2018

SUBJECT: Request for Review of MAR17-0041, Tualatin Professional Center Driveway Adjustment Land Use Decision Located at 6464 SW Borland Road

---

ISSUE BEFORE THE COUNCIL:

This item is continued from the January 8, 2018 meeting. The applicant's representative requested to continue the Request for Review hearing to a date certain of April 23, 2018 (today), to allow the Tualatin Professional Center to submit a Variance application. VAR18-0001 was reviewed by the Planning Commission at a hearing on April 19, 2018. To provide adequate time to renotice the Request for Review hearing and prepare a staff report with the Variance decision and evidence, this item will be continued to the May 14, 2018 City Council hearing.

Council must make a final decision on the MAR17-0041 Request for Review before May 31, 2018 to meet the 120-day rule extension.

The Tualatin Professional Center Minor Architectural Review, MAR17-0041, driveway adjustment proposal was approved with conditions by staff on October 12, 2017. TPC submitted a request for review on October 26, 2017.

RECOMMENDATION:

Motion to extend the Request for Review of MAR17-0041 to a date certain of May 14, 2018.

Attachments: Attachment A - Motion to Suspend

BEFORE THE TUALATIN CITY COUNCIL

IN THE MATTER OF MAR 17-0041 REQUEST FOR REVIEW BY TUALATIN PROFESSIONAL CENTER	**MOTION TO SUSPEND REQUEST FOR REVIEW**

The appellant, Tualatin Professional Center (TPC) hereby requests that its Request for Review of MAR 17-0041 be suspended until April 23, 2018 to allow TPC to apply for a major variance to the Tualatin Planning Commission. Should the City Council grant the motion, the appellant agrees to extend the 120-day rule to May 31, 2018.

We have spoken to city staff and they are supportive of the TPC Motion to Suspend. To that end, city staff has prepared a Staff Memorandum of Support for the TPC Motion which details the procedure for the variance application and MAR 17-0041.

TPC has reviewed the staff memorandum and agrees with the process of review for the variance and associated MAR 17-0041 pending before the Council.

DATED this 3rd day of January, 2018.

Respectfully submitted,

Dorothy S. Cofield
Of Attorneys for TPC
